LETTER TO SHAREHOLDERS

G4-DMA ECONOMIC PERFORMANCE

G4-1, G4-2

DEAR SHAREHOLDERS,

2016 proved to be the most complicated year we have had at Pochteca in a very long time. Several of our main market sectors suffered major contractions, and we experienced a deflationary environment for most of the products we sell.

One of the main adversities we encountered in 2016 was the erosion of industrial activity in Brazil. Specifically, the declines in industrial output of 3.2% in 2014, 8% in 2015, and 6.6% in 2016 have led to a major reduction in demand for our products.

Moreover, the considerable revaluation of the Brazilian real negatively affected Coremal's margins as inventories acquired at higher dollar exchange rates had to be sold at a lower exchange rates.

A second factor that negatively affected our earnings was a generalized deflation of our product prices. Prices for corn and milk derivatives, mining inputs and petroleum derivatives have been declining in recent years such as the more than 50% drop in petroleum derivative prices in just the past two years. This deflation greatly alters the profitability of many products so that even if logistical, packaging and shipping costs are not greater in absolute terms, they increase significantly as a percentage of the gross margin and the sales price.

A third factor was a drop in demand for inputs in the oil exploration and drilling sector. Between June 2012 and the end of 2016, the number of active rigs in Mexico, Brazil and the United States decreased 82%, 87% and 68%, according to data published by Baker Hughes on line. While our product and industry diversification allowed us to offset part of

the reduction in sales to the petroleum industry, it was not possible to completely compensate for those losses as this sector is our most important sales segment.

Lastly, we also experienced a negative effect on the level of mining -previously our second most important market,

after oil and gas- as mineral product prices have fallen considerably in recent years and, as a result, so have mining inputs prices and volumes.

In contrast to the strong results we reported for 2015, during 2016 we achieved only a slight 1% increase in sales, which totaled Ps 6.14 billion. The gross margin narrowed 70bp as it fell from 18.2% to 17.5%. Operating income experienced a sharp 48% contraction to Ps 116 million. EBITDA fell 27% to Ps 248 million pesos.

In Mexico, we have yet to see signs of a recovery in sectors that are of key importance to Pochteca such as mining as well as oil exploration and drilling, so we have focused our efforts on other markets offering growth opportunities. In Brazil, industrial production has undergone a severe decline and we do not anticipate a significant recovery in the near term although there appears to be a consensus that the worst has passed.

In an effort to mitigate risks and strengthen our earnings margins, in 2016 we introduced several initiatives directed at bolstering our competitiveness and expanding our cash position. As a result, we have:

- Modified the company's corporate structure to lower its operating expenses and more efficiently align the commercial area with that of operations.
- Intensified our diversification toward blends and higher value added products, which protects us from price fluctuations.
- Sought to lower our working capital days in order to increase liquidity and achieve growth using fewer resources.
- Invested in systems focused on raising productivity and achieving a more efficient management of our customer and product bases.

We trust that these initiatives will pay off in 2017.

One favorable element within this enduring complex environment is that oil prices appear to have bottomed and in past months have embarked on an uptrend. Recently this has begun to translate into higher prices for some oil derivatives.

We are confident that our customer and product diversification strategy will allow us to shield sales and

margins from much of the price deflation of recent years, as well as from the intense competition generated by the sharp downturn in the oil, gas and mining sectors.

Our net debt totaled Ps 728 million at the end of 2016, Ps 174 million or 31% more than in 2015. On the one hand, Coremal’s net debt increased 7% in reais, from 46.8 million to 49.9 million. The peso/real exchange rate depreciated 45% during the same period from 4.36 to 6.33 pesos per real, so Coremal’s net debt increased 55% in pesos, rising from Ps 204 million to Ps 316 million. On the other hand, during 2016 we amortized bank debt in Mexico for Ps 140 million.

Pochteca’s Net Debt / EBITDA closed 2016 at 2.9 times, up from 1.6 times at the end of 2015. This latest level is above our internal policy of restraining debt to no more than 2 times and is the result of weaker EBITDA than had been expected, as well as a rise in debt in Brazil as expressed in pesos resulting from the real’s revaluation. We are confident that with the reduced expense levels achieved with our corporate restructuring, the gradual recovery in Brazil, and the absence of the non-recurring expenses of 2016, our EBITDA will recover to better than 2015 levels, and that this metric will return to our target range levels.

Ricardo Gutiérrez Muñoz
Chairman of the Board of Directors

G4-EC2

SUSTAINABILITY

At Pochteca we are making efficient use of natural, economic and social resources in ways that conform to our commitment to sustainability.

Our Integrated Management System (IMS) is the basis for assuring the successful realization of our financial objectives and growth targets while complying with the national and international standards that we have voluntarily adopted. Similarly, our secure and world class custody chain adds value to the raw material producers (our suppliers) and chemical products users (our clients).

We will also continue to endeavor to establish performance indicators that allow us to measure and control product safety, occupational health, quality and safety risks and environmental impact risks.

We are well prepared to continue handling challenges such as those we encountered in 2016. We are confident that with our capable and committed personnel we can regain our profitability and strengthen our financial position.

We wish to recognize and thank our shareholders, colleagues, clients, suppliers, and financial institutions for the support they gave us during 2016.

Armando Santacruz González
Chief Executive Officer

Our **5** main products = **7.5%** from sales

CUSTODY CHAIN

Our world class, secure custody chain differentiates us from the rest of the industry. We are the only company in Latin America with RDP (Responsible Distribution Process) certification from the NACD (National Association of Chemical Distributors). Our management system, has been evaluated and approved by ANIQ (National Association of Chemical Industries, A.C.) as guaranteeing security in our custody chain, thereby enabling us to use the association's SARI seal of approval. We also have FSC® (Forest Stewardship Council) and ISO-9001-2008 certification.

We implement best practices that are continuously audited by clients and suppliers.

DIVERSIFICATION

G4-8

Our diversification of customers, products, industries, regions, channels and suppliers is the key to our commercial strategy and has been a major risk mitigation factor. This has allowed us to protect sales and margins while differentiating ourselves from the competition. By the same token, each of our business segments attends to dozens of industries.

OPERATING AND FINANCIAL PERFORMANCE

MARKET OUTLOOK

Three main factors led to the weakening of our results, especially on the levels of gross income (-3%), gross margin (-70bp), operating income (-48%) and EBITDA (-27%).

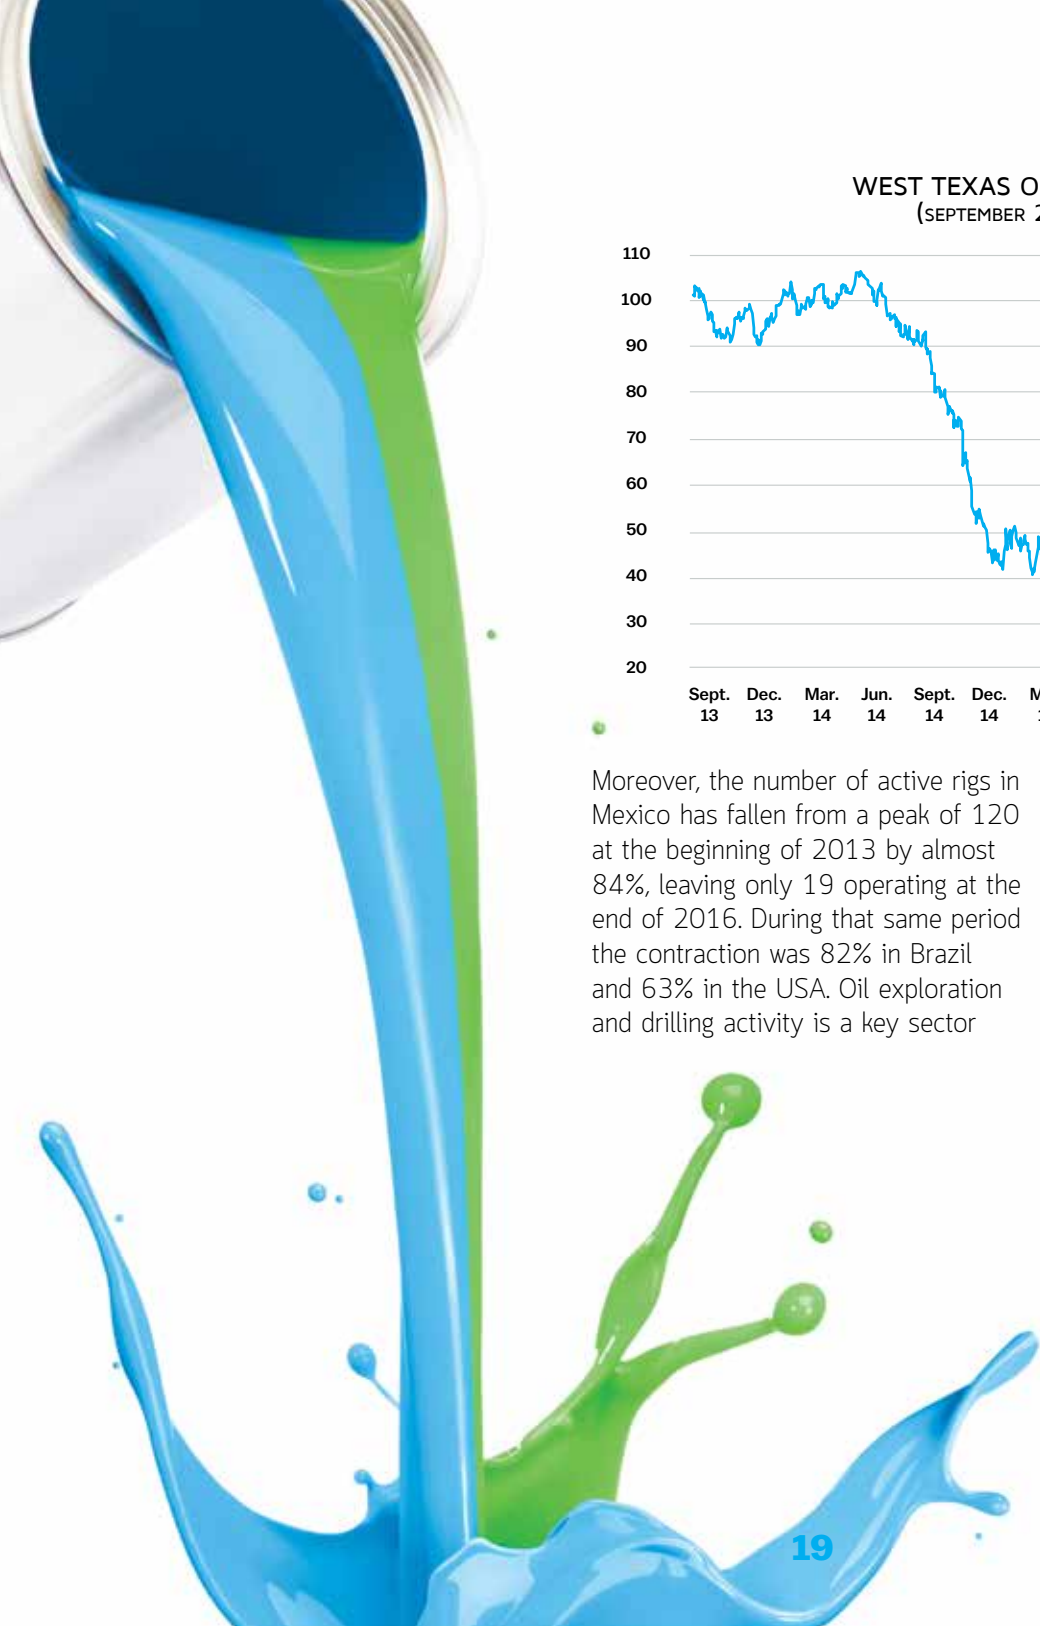

The first one is the deterioration of industrial activity in Brazil, which in each of the past three years decreased at 12 month rates of: 3.2% in 2014, 8% in 2015, and 6.6% in 2016. This situation has adversely affected Pochteca's operations in Brazil and led to a sharp reduction in demand for our products given that industrial activity is the main sales driver of our Brazil business.

It is also important to note that Brazil's GDP weakened considerably after Pochteca acquired Coremal in December 2013. The country's economy grew a mere 0.5% in 2014 and then fell 3.8% in 2015 and by 3.5% in 2016.

Secondly, there is the recession in the oil and gas industry that extends to both Mexico and Brazil. According to data published on line by Baker Hughes, the number of active rigs in the United States, Mexico and Brazil continued to fall significantly during 2016 with declines of 18%, 51% and 66%, respectively.

ACTIVE OIL RIGS
(JUNE 2012 = 100)

WEST TEXAS OIL (WTI) PRICES
(SEPTEMBER 2013 = 100)

Moreover, the number of active rigs in Mexico has fallen from a peak of 120 at the beginning of 2013 by almost 84%, leaving only 19 operating at the end of 2016. During that same period the contraction was 82% in Brazil and 63% in the USA. Oil exploration and drilling activity is a key sector

for Pochteca, and we do not foresee a recovery in either the near or intermediate terms.

The third negative factor has been price deflation in the case of most of the products we sell.

However, amid the continuing complexities of the environment we are faced with, one favorable development was the recovery of oil prices, which increased 45% between 2015 and 2016 from US\$37.04 to US\$53.72 per barrel. It is important to mention that we have witnessed recently upward movement in the prices of some products, including petroleum derivatives.

INTEGRATED MANAGEMENT AND SUSTAINABILITY SYSTEM

Pochteca has an Integrated Management System (IMS) that works as a base for our company's strategy as it allows us to translate into operation, controls and indicators of each of the elements of our culture.

INTEGRATED MANAGEMENT SYSTEM POLICY

At Pochteca, we focus on prevention and continuous improvement, to meet the needs and expectations of our clients, and to attain our financial and growth goals, while making sure we fulfill each of our 4 sustainability pillars.

1. Our People: We look after their well-being, health and safety, offering a fair treatment in keeping with the law.

2. Environment: We have concrete goals to reduce our environmental footprint and preserve resources, for future generations.

3. Supply Chain: We strive to steadily reduce our operating expenses, minimizing risks throughout our supply chain, sharing our principles and values with our business partners.

4. Community: We act in accordance with our values, supporting communities and helping them build a culture of responsibility, cooperation and respect for the rules.

MATERIALITY

G4-17, G4-18, G4-19, G4-20, G4-21, G4-22, G4-23

For the purpose of identifying those material aspects of our operations, that impact our stakeholders and must be included in our sustainability report, in 2016 we undertook a Materiality Study that was conducted by an external consultant. That study took as its point of reference, a benchmark between the maturity of major companies in the sector dedicated to the specialized distribution of consumer chemical products, and the risk characterized by sectorial and social regulations -whether legally binding or voluntary- for economic, social and environmental matters.

The study included a review of public information from the four major companies in the sector dedicated to the distribution of specialized consumer chemical products, four

sectorial and four social institutions. The aspects and indicators that were reported on included information regarding our operations in Mexico, unless otherwise specified.

OUR STAKEHOLDERS

G4-24, G4-25, G4-26, G4-27

We have identified our stakeholders, from the point of strategic planning, and maintain commitments, with each one of them.

With our clients:

We provide them with services in addition to the sale of products, such as:

- Training in safety requirements and regulations for product handling
- Safety evaluations and recommendations on installations and infrastructure
- Advisory services on product

uses and functionality through our application laboratories

- Post sales service
- Sustainable product alternatives
 - » FSC certified paper
 - » Sugar substitutes
 - » Low sodium materials
 - » Used-solvent recycling
 - » Biodegradable materials

With our associates:

- Strict labor compliance
- Agreements with suppliers of goods and services that set preferential conditions and prices
- Policy regarding home office and flexible hours
- *Orientame* line
- Participation of our associates' children in a drawing competition about a safe environment

With society in general:

- Participation in mutual aid groups
- Training in schools and institutions
- Donations to communities
 - » We support the Kardias Foundation's race every year through donations from our associates

G4-15

- Annual donations to government agencies and non profit institutions
 - » Donations from our collaborators to Julian Foundation
 - » Donations of equipment and material to firemen for their drills
 - » Donation of equipment to Cruz Roja (Red Cross)
 - » Donation of office supplies to DIARQ
 - » Economic donation to Fundasida

G4-16

With our suppliers:

- We share best practices
- We evaluate performance
- We identify and collaborate areas of opportunity in our supply chain

With our competitors:

- Honest and professional competition
- We share best practices through the associations and groups we belong to: ANIQ, CANACAR, AMEDIR, ANAFAPYT, AIVAC Y CANACINTRA, *México Unido contra la Delincuencia* (Mexico United Against Crime)

With our shareholders and commercial partners:

- Loyalty and competitive return on investment

POCHTECA: A HUMAN FOCUS

OUR PEOPLE

In order to provide our associates a safe, professional and equitable working environment, we have focused our efforts on working with various programs and tools that favor proper growth and improvements in professional development.

SUSTAINABILITY STRATEGY

As a sustainable company we comply with applicable regulations, and assure that our products are of the best quality, and adhere to the highest sustainability standards. We have established the following guidelines for reaffirming our commitment, as

well as regulations, policies, manuals and procedures for guaranteeing their fulfillment.

ETHICS AND INTEGRITY

G4-DMA LABOR PRACTICES GRIEVANCE MECHANISMS
G4-56, G4-LA16, G4-HR3, G4-HR12, G4-SO11

Through the transparency line mechanism, which all our associates, customers, suppliers and surrounding communities can access, and, who are also regularly reminded of its existence, we receive complaints regarding any deviation of our associates from our Code of Ethics, to whom we are all committed.

CODE OF ETHICS

- Integrity and equality of all people
- Upright conduct
- Leadership with respect
- Truthful information
- Proper use of tools
- Confidentiality
- Fair treatment
- Discretion

G4-LA16, G4-HR3, G4-HR12, G4-SO11

The complaints are handled by an independent company, and evaluated by the Ethics Committee, to develop the appropriate action plans.

G4-LA6

The results of this complaints in 2016 were:

We received 31 complaints and one follow up case.

1

Category
58% of the complaints were associated with Employee Harassment (18/31)

2

Means of contact
61% were received through the Web Page (19/31)

3

Anonymity
77% of the complaints were presented anonymously (24/31)

4

New cases
97% of the complaints were New Cases (31/32)
97% of the complaints were made by employees (30/31)

5

Receipt by day of week
29% of the complaints were received on a Thursday (9/31)

The complaints by category are:

G4-S07

- Employee harassment - 18
- Breach of policy - 4
- Conflicts of interest - 2
- Labor negligence - 1
- Unfair competition - 1
- Discrimination - 1
- Violation of laws or official regulations - 1
- Bribery - 1
- Unethical benefits or treatment with suppliers - 1
- Customer complaints (Service/Treatment by Personnel) - 1

G4-DMA ANTI-CORRUPTION
G4-S03, G4-S04, G4-S05

Based on our analysis of these reports, we have introduced training plans to strengthen knowledge and application of the code of ethics, policies and procedures among all our personnel, and leadership workshops for all employees with managerial responsibilities.

Operating in strict adherence to our values and code of ethics is a basic principal for Pochteca, and we transmit this information to all employees at the time they are hired, and regularly reinforce it after that.

In keeping with this principle, and in strict accordance with the law, we allocated the resources necessary to disclose and follow the appropriate legal channels regarding a case of corruption in Quintana Roo, involving an apocryphal labor lawsuit that was used to justify the freezing of more than Ps 4 million in company bank accounts.

This case, which is still under way, exposed a network of corruption among local conciliation and arbitration boards that had operated under the previous government of that entity.

G4-DMA MARKET PRESENCE
G4-EC5, G4-EC6

92% of the company's senior management is native to Mexico City, where they also perform their duties.

In all the regions where we are present, our personnel's wages are above the

official minimum set by the National Minimum Wage Commission. The range of salaries depends on the type of position and each person's qualifications. In no cases are these wages determined on the basis of gender, age, ethnic origin or social condition.

WORKFORCE

G4-DMA EMPLOYMENT, G4-EC6

We make sure that all of our associates may take maternity leave in compliance with local regulations, and in keeping with Mexico's Federal Labor Law, we guarantee an employees' right to return to work post maternity leave. We also provide facilities for them to extend such leaves through a combination of flextime and time spent working from home as they resume their duties. To that end we have made substantial investments in infrastructure and equipment to assure employees have connectivity with their jobs at all times. Equipment availability is as follows:

- 38% with portable computers
- 60% with cellphones

Furthermore, we have upgraded voice and data connections as follows:

- VOIP telephone service that with call forwarding between the employees' office extension and their portable computer
- Being able to securely access their information from anywhere by means of a VPN.
- Cloud-based information access

services, for example using our internal communication system, called "PochtecaNet."

- We consider our support for employees with newborn children a complement to our actions in favor of gender equity.

G4-DMA EQUAL REMUNERATION FOR WOMEN AND MEN

G4-LA13

Salary differences between men and women persist nationwide. At present men earn 10% more on average than women. The goal is to gradually reduce this disparity. For that reason our compensation strategy includes the objective of basing remunerations on the associate or candidate’s competency while assuring that gender does not enter into the evaluation equation.

OCCUPATIONAL HEALTH AND SAFETY

G4-DMA OCCUPATIONAL HEALTH AND SAFETY

G4-LA7, G4-LA8

Results from our health and safety plan for 2016 show no heightened work-related health risks or trends on the part of our associates. The risk evaluation includes those to health, so our investment in personnel protection equipment and training in the proper use of loading and unloading equipment and techniques is helping to avoid work related sickness and injuries.

We invested Ps 1.5 million in 2016 on personal protection equipment for all our associates in keeping with the risk involved in each type of work.

We also operate the “Orienta” support line, which allows us to improve our associates’ quality of life.

What follows is a brief overview of the type of attention provided in 2016:

GENERAL REPORT

Comprehensive data

Type of user	
Relative	9%
Employee	91%

281

Online visits to Orienta-me
117

Type of need	
Family economy	3%
Legal	23%
Emotional	46%
Nutritional	6%
Medical	22%

According to the EAPA (Employee Assistance Professionals Association), an international organization for employee assistance professionals that helps regulate employee assistance programs, a healthy rate of employee usage of EAP (Employee Assistance Programs) is between 8% and 10%. Our 30% rate during the year is far above the average rate.

SAFETY

G4-LA5

We maintain health and safety commissions in each workplace, in compliance with Mexico’s Federal Labor Law. Approximately 10% of our entire personnel are engaged in these commissions.

Brigades receive training each year in:

- Firefighting
- First aid
- Evacuation

Every six months we go through a process of creating brigades, assigning responsibilities and conducting emergency drills, all of which are duly documented.

G4-LA6

Since 2013, we have been strengthening our health and safety strategy through training, supervision and monitoring, as well as by raising safety awareness among our personnel both within and outside our facilities.

Accidents this year were as follows:

101 disability days in 2016

Our incidence rate per 100 full-time employees remains well below the US Occupational Health and Safety Administration (OSHA) maximum level of 3.0.

Year	Accident rate in operation areas per 100 hours of full-time employees
2013	1.381
2014	0.418
2015	0.650
2016	1.166

TRAINING

G4-DMA TRAINING AND EDUCATION

G4-LA10

During 2016 we conducted 85 training programs by specialization, lasting a total of 287.25 hours. These programs were conducted through various media depending on the type of program.

- a. Virtually through Pochteca Virtual University (UVP in Spanish)
- b. On site, within the company
- c. On site outside the company

G4-LA11, G4-HR2

Through what we call the Pochteca Development Potential tool (DPP in Spanish) our associates receive periodic evaluations with objectives established at the beginning of the year. A feedback session is conducted at mid-year and the final evaluation is provided at year’s end.

The following table provides a breakdown of 2016 evaluation results:

By job category	
Administrative	58%
Directors	75%
Managers	67%
Head of department	68%
Operational	41%
Sales	66%
By gender	
Male	44%
Female	84%

We employ a 50-member security staff, including security guards and industrial

safety personnel, 30% of whom received formal training in Human Rights issues while participating in courses on:

- Our Code of Ethics
- Internal policies and procedures
- SEDEX requirements
- TFS requirements

EVALUATION

G4-DMA ASSESSMENT

G4-HR7, G4-HR9

40% of our employees have been the subject of sustainability audits through programs like SEDEX (Supplier Ethical Data Exchange), TFS (Together for Sustainability), or responsibility evaluations required by our clients or suppliers.

POCHTECA: A SUSTAINABLE APPROACH

OUR PLANET

G4-DMA MATERIALS, G4-DMA PRODUCTS AND SERVICES, G4-DMA ENERGY

G4-EN27, G4-EN31, G4-EN34

At Pochteca we are concerned about the environmental problems facing our planet. As a result, we work day to day to mitigate the risks that our operations might pose while also looking for preventative measures.

Our work is aligned with both national and international environmental protection standards. This is why our operations are conducted in accordance with necessary regulations. These obligations are considered part of the controls, monitoring and reports included in our Integrated Management System nationwide.

BIODIVERSITY

G4-DMA BIODIVERSITY

G4- EN11, G4-EN12, G4-EN13, G4-EN14

Our facilities are located in industrial parks where land is zoned for the commercial activity we engage in, and in none of them, conditions have been established for biodiversity conservation.

Furthermore, our Environmental Risk Assessments (ERA), spell out the types of flora and fauna that could be affected in the event of a contingency. However, based on recommendations from Pochteca's Accident Prevention Program (APP), operational and infrastructural controls are established, in cases where harm to biodiversity could be generated.

As a precautionary measure, we maintain environmental liability and risk insurance coverage to cover for anywhere between US 1.5 to 3 million in environmental damages.

WATER

G4-DMA WATER
G4-EN8, G4-EN9, G4-EN10

The solvent recovery process requires the use of deionised water in the distillation process. For this purpose we have at our disposal five units that require 300 liters of water per unit. It has not been necessary to reload them since we deployed the first such equipment in 2014 as each unit has a vapor recovery system that re-condenses the water used and maintains the required levels without the need to refill them.

We also use a cooling tower to service the five units. The tower requires 700 liters of water, and since the tower was put into operation it has not been necessary to refill its container.

So far we have had no need for our own water harvesting system. The water supply for all of our facilities except that of Cancun comes from municipal waterlines or from the purchase of tanker truckloads of water. Only the Cancun facility has its own well because it only uses that resource for its sanitation needs. Year over year, we are within the level of water consumption authorized by Mexico's National Water Commission (CONAGUA).

The residual water that we generate derives exclusively from sanitation services except for one plant whose drum washing operations demands a water treatment plant, for which we conduct annual studies to assume that the discharge parameters are in keeping with applicable regulatory standards.

MATERIALS

G4-DMA MATERIALS
G4-EN1, G4-EN28

Below is a list of the materials used for packaging and storage:

Container	Number of pieces
Bucket	2,954
Jug	6,236
Drum	9,794
Tote	244
Total	19,228

RECYCLING

G4-EN2

By washing the metal drums in our San Jose and Minatitlan plants, we were able to reuse 89% of them at an effective rate of 4.49 turns per drum. Previously used wood pallets, are purchased and reconditioned locally as part of our commitment to reuse materials. The effective rate of re-use was 78%.

G4-EN7

Because of the nature of the products we sell, the only containers that are recoverable are drums and jugs. For these, we have a special recovery process for washing them on the premises -when this process is enabled- or we outsource the washing process to suppliers who have the necessary facilities.

ENERGY

G4-EN6, G4-EN7

In relation to 2015, we achieved the following energy reductions:

Aspect	2016 Results
Diesel	5% savings from the substitution of 21 transportation units.
	Improvement in the logistics process, compliance with prevention maintenance programs.
	Adoption of the freight tool in SAP.
Gasoline	15% savings by card use per unit with mileage control.
	Compliance with prevention maintenance.
Electricity	7% decrease in consumption through operations optimization.
Water	Slight decrease of 1% because the expense of this resource does not depend on the operation but on the use of general services.

EMISSIONS

G4-DMA EMISSIONS

G4-EN15

For the first time we made an estimate of the CO₂ emissions generated by our processes. This calculation was limited to our consumption of electricity, gasoline and diesel, as well as mobile sources as our process consists exclusively of storage and distribution, so emissions are generated by transportation units and not by processing equipment, which is to say fixed sources.

Result: We calculate that 714 Ton of CO₂ was generated in 2016.

To arrive at these values, we employed the emissions calculator of the National Emissions Registry (RENE) published by Mexico's Ministry of the Environment and Natural Resources (SEMARNAT). Through these calculations, we were able to observe that the emissions level of our operations remain well below the limit established by the authorities for mandatory presentation of an Annual Operating License for producers of atmospheric emissions.

Result: The SEMARNAT limit is 25,000 annual Tons of CO₂, our reading was 1,054 Tons

Result: The generation of CO₂ from direct electrical energy sources was 437 Tons.

G4-EN16, G4-EN17

Because we do not have any industrial processes in which heating, refrigeration or steam are required, there is no need for the calculation of indirect greenhouse gas emissions.

G4-EN19

We have 93 company cars assigned to executives and sales representative, and 62 transportation vehicles. To guarantee proper operation and compliance with the applicable environmental regulations, we keep service records on all our vehicles and have a policy on switching out vehicles after a certain period of use or mileage; we also assign gasoline cards to control consumption.

These efforts include:

1. Upgrading the vehicles we use for transporting hazardous materials to

newer vehicles with higher fuel yield and ecological efficiency.

2. Optimizing logistical processes to reduce travel mileage, making a more efficient use of our transportation vehicles.

G4-EN20

In 2016, we acquired 29 Nitro-Strike Fire Suppression Systems, which are able to put out any kind of chemical fire in less than 5 minutes. The system extinguishes any trace of hazardous residue and prevents fires from restarting. This equipment was installed in 14 sites susceptible to fire hazard.

EFFLUENTS AND WASTE

G4-DMA EFFLUENTS AND WASTE

G4-EN22, G4-EN23, G4-EN24

Within our operations, we generate hazardous wastes in connection with:

- Maintenance processes
- Replacement or breakdown of machinery and equipment
- Non-compliant product
- Packing and wrapping material
- General services

In all these cases, the waste is disposed of responsibly, in keeping with applicable SEMARNAT laws.

During handling of materials, containers or packages may be breached or broken, product may be non-compliant or other emergencies may arise. This is why, our facilities are rated "small generators" of hazardous waste, and only three of our plans are rated "large generators." None of these facilities surpassed the maximum limits established for the category. We generated a total of 200 tons of hazardous waste in 2016.

In order to reduce the amount of non-hazardous waste we produce, we also have systems for monetizing the following types of waste:

- Sale of scrap containers: 111,657 units
- Waste paper, cardboard, plastic and wood from containers and wrapping, sold to recycling companies: 657 Tons.
- Collection of office paper: 3 Tons.
- Recycled computer equipment: 111 computers, 350 phones, 17 fax machines and 300 keyboards

Leaks and spills are among the environmental risks we contemplate in our operational risk matrix. To that end we have the infrastructure and equipment necessary for containment in the case of storage and transport of liquids as well as the very specific emergency protocols and procedures for each case.

Results:

- » 8 spills in 2016
- » 102,330 liters spilled and 28,000 kilos of dry solids

The most severe events of this kind were:

- 94,019 liters of solvents spilled at our San Luis facility due to a fire at the recovery plant.
- 28,000 Tons of sodium meta bisulfite lost when a truck turned over during transportation, although this material is not considered hazardous, we worked together with the trucking company to recover the material and dispose it according to the laws of Mexico City.

In all cases, the spills took place within the primary containment areas of the product handling zones, meaning on concrete paving with protective trenches.

- The material was collected and disposed of according to our procedure for handling hazardous waste.

In proportion to the total volume of materials moved, in kilos, the spills amounted to 0.00002%.

NO. OF LEAKS AND SPILLS VS. WEIGHT MOVED

In our investigation of these spills, we identified the need for training our forklift operators, and we proceeded to include such additional instruction to on top of what was already contemplated in our annual training plan.

Concerning the spill generated by the accident in the recovery plant in San Luis Potosí, the analysis of the event identified:

CAUSES

- A failure to comply with solvent bottling procedures.
- Error in process of preserving materials due to spill on container and time in which the spill persisted.
- Lack of supervision.

EFFECTS

- Vapor accumulation resulting from the spill and high temperatures.
- Static produced by gravity flow bottling.

LESSONS LEARNED

- Devote the necessary time to training in operating procedures before new employees start work
- Always have a more experienced employee supervising
- Raise safety awareness among personnel
- Ensure that firefighting equipment (sprinklers and extinguishers) are in satisfactory operating condition
- Maintain formal brigades staffed with trained employees
- Conduct drills twice a year

PREVENTIVE AND CORRECTIVE ACTIONS

G4-14

1. Safe workplace campaign, including:
 - a. Weekly safety videos
 - b. Regular evaluations
 - c. Feedback sessions with all site personnel
2. More frequent safety rounds by Managers
3. Screen savers
4. Newsletters

In connection with this event, the San Luis Potosi site was visited by local, state and federal authorities, including:

- Municipal and state civil protection
- State and federal Ministry of Labor
- State environmental authorities
- Federal environmental protection agency (PROFEPA)

G4-S08

All of these agencies issued inspection certificates containing urgent remediation steps, which have been addressed and resolved, according to each type of required procedure. At present, only the measures recommended by the Federal Attorney for Environmental Protection (PROFEPA) are

opened and pending; these involve soil remediation and civil protection relating to investments. A fine of Ps 7,000 was levied, by the municipal civil protection authorities; the other agencies have not yet formally closed the procedures.

G4-DMA COMPLIANCE

G4-DMA SUPPLIER ENVIRONMENTAL ASSESSMENT

G4-12

One of the values that guides the operation of Grupo Pochteca is caring for the environment and abiding by all related norms. For that reason, our management system includes monthly monitoring of all norms, the detection of any violations and action plans to avoid their recurrence, as well as allotting the resources to necessary to fulfill those objectives.

The types of activities our company is engaged in requires that we abide by environmental rules at the municipal, state and federal levels. These obligations are contemplated as part of the controls, monitoring and reports that are part of our Integrated Management System (SIG) nationwide. These reports are reviewed each month by the Senior Management to assure that we maintain the necessary compliance.

G4-EN29

In 2016 we were the target of 35 inspections, nine by federal environmental authorities. From this visits we had 4 sanctions: 2 by the Ministry of Labor and Social Security (STPS), 1 from the Ministry of the Environment and Natural Resources (SEMARNAT) and 1 from Civil Protection, totaling Ps 160,280 pesos. The violations in question were dealt with to the satisfaction of the authorities.

REGULATORY COMPLIANCE

In addition to such governmental inspections, our clients and suppliers conduct an annual evaluation of our environmental performance through second and third hand audits.

In 2016 we were the subject of 27 audits, 21 of which comprised part of their evaluation of environment aspects. In all of these we received favorable evaluations and in some cases suggestions for improvement.

The results of such verifications are communicated to the organization through our communications and collaboration portal PochtecaNET. Moreover, we share each branch location's normative performance though their site within that same portal.

Environmental legal requirements are regarded as one of the main criteria to be used for acceptance or rejection when evaluating possible new projects. For that reason, over the course of the year we requested the necessary permits and studies for the installation and operation of three solvent distillation units at our facilities in Leon, Guanajuato, Mexico.

EXPENSES AND INVESTMENTS

G4-DMA OVERALL
G4-EN31

Data highlights

- In 2016, Pochteca invested Ps 800,000 in environmental protection measures, including permits, studies and legal consultancy.
- Following the San Luis incident, an additional Ps 1.5 million was allocated to restoring the affected area and implementing the local and federal environmental authorities' recommendations. The process will remain under way in 2017 until the site is cleared for operation after remediation is completed.
- A budget line of Ps 500,000 was assigned for renting print-control equipment that records the environmental impact of each user's printing activity in terms of the number of trees consumed and the CO₂ produced. This system helps build awareness and commitment to reduction among our employees.

TACUBAYA

Total paper sheets: 310,129
Trees consumption: 37
CO₂ consumption: 3,939 kg
Equivalence of hours of a light bulb light: 246,604 hours

By investing Ps 35 million in 2015 to acquire 3 solvent recovery systems, we were able to increase the volume of material recovered in 2016, as follows:

2015	2016
1,660 liters	5,538 liters

PERFORMANCE EVALUATION (NUMBER OF CLIENTS AND SUPPLIERS ASSESSED)

G4-EN32, G4-EN33, G4-LA14, G4-LA15

ENVIRONMENTAL IMPACT OF THE USER

SAN JUAN

Total paper sheets: 928,521
Trees consumption: 111
CO₂ consumption: 11,792 kg
Equivalence of hours of a light bulb light: 738,329 hours

RESPONSIBLE SOURCING

SUPPLY CHAIN

GA-DMA SUPPLIER ENVIRONMENTAL IMPACT ASSESSMENT

G4-DMA LABOR MANAGEMENT RELATIONS

G4-DMA OCCUPATIONAL HEALTH AND SAFETY

G4-DMA SAFETY MEASURES, G4-DMA SUPPLIER HUMAN RIGHTS ASSESSMENT

G4-DMA SUPPLIER SOCIAL IMPACT ASSESSMENT, G4-DMA NON-DISCRIMINATION

G4-EN32, G4-LA14, G4-LA15, G4-HR7, G4-HR10, G4-HR11, G4-SO9, G4-SO10

In order to guarantee a responsible supply chain, we share with our suppliers the Integral Management System Policy and the Suppliers' Manual. Both documents establish our commitment to taking care of the environment and we ask our business partners recognition of and abidance of those documents.

G4-DMA FREEDOM OF ASSOCIATION AND COLLECTIVE BARGAINING

G4-HR4

As part of our human rights practices, we always require of all suppliers that offer to provide services at our facilities, official documentation guaranteeing its compliance with minimum age requirements, as well as its registration with any social security service.

G4-HR3, G4-HR5, G4-HR6

Our code of ethics spells out Pochteca policies in relation to:

- Freedom of association
- Non-discrimination and equal opportunity
- Banning forced and child labor

G4-DMA PROCUREMENT PRACTICES

G4-EC9

80% of our suppliers provide inputs and services from which 100% are local.

The remaining 20% provide raw materials from which:

- Inorganic chemicals, solvents and blends 70% are local and 30% foreign
- Food segment 18% local and 82% foreign
- Lubricants segment is 100% foreign
- Paper segment is 30% local and 70% foreign

SUPPLIER ASSESSMENT

G4-DMA SUPPLIER ASSESSMENT FOR LABOR PRACTICES

As part of our supplier selection and evaluation, we apply a supplier pre-evaluation questionnaire in which we request evidence of compliance with a Sustainability Management System or a self-evaluation of its performance.

	Yes	No	Partial	N/A	Total	Compliance %	
Quality	52	0	0	0	Maximum to obtain	52	20%
					Obtained	52	
Environment	36	0	0	0	Maximum to obtain	36	20%
					Obtained	36	
Occupational health and safety	40	0	0	0	Maximum to obtain	40	20%
					Obtained	40	
Food safety	40	0	0	0	Maximum to obtain	40	20%
					Obtained	40	
Social responsibility	32	0	0	0	Maximum to obtain	32	20%
					Obtained	32	
Total evaluation							
Food raw materials supplier					100%		

We evaluated the supplier’s performance with each delivery and in the event we detected any shortcomings we sent a non-compliant

service report that becomes part of the semester compliance calculation against the total of services for the period.

Currently, 80% of our raw material suppliers and 70% of our

transportation suppliers are rated as trustworthy by this measure. To follow up with suppliers who fail to comply with the required standards, we have designed plans of action in order to work together to obtain tangible improvements.

G4-EN34

In the above-mentioned manual, we provide contact numbers suppliers can use, to report any breach of these guidelines through a transparent hotline. We also have complaint boxes for neighboring community to report environmental risks. As a result, in 2016, we received no complaints of this kind.

RESPONSIBLE SALES

CUSTOMER HEALTH AND SAFETY

G4-DMA CUSTOMER HEALTH AND SAFETY

G4-DMA PRODUCT AND SERVICE LABELING, G4-PR1

In order to offer our clients environmentally-safe alternatives, in the Pochteca paper division we introduced 30 new SKUs for FSC-certified products, and the volume of tons of these products sold increased from 2,221 to 2,663 Tons. Today, FSC-certified product SKUs account for 20% of our total product catalog.

G4-PR3

We are also in the process of introducing environmentally-friendly products into our raw materials division, which currently make up 15% of the total catalog of this product families.

- Water-based grease and paint removers for metal and plastic.
- Tensioactive materials like nonylphenol for lauryl alcohols.
- Sodium gluconate as a chelating agent in cleaning products, reducing the use of EDTA.

G4-PR2

From the incidents reported during the period, none were related to non-compliance with voluntary regulations or codes related to product impacts, since the analysis cases were found to have failed to comply with the procedures or lack of training.

Because the products we make are subject to international and national standards that require us to identify their degree of risk, Pochteca and its clients require that 100% of the products comply with the requirement applicable to them according to the type of risk or product in question.

G4-PR6

Some of the applicable standards are:

- NOM-018-STPS
- OHSAS
- GHS
- PROFECO

G4-PR4

To date we have not received any report of an incident or breach of regulations regarding product or service labeling.

In order to identify the level of our customer satisfaction and to follow up on areas of opportunity for improvement, we have a customer satisfaction survey procedure in which we define how often they are applied and how they are planned and conducted. Normally, we hire an outside firm to handle these surveys.

This procedure uses a quantitative methodology involving multiple-choice questions that are asked of certain clients selected on a representative sample basis. A holistic sample is

defined according to business areas and sizes –the only requirement is that they have purchased our products in the past year.

In the last two months of 2016, we conducted two customer satisfaction surveys: one for our Raw Materials division and one for our Paper division. Both surveys had a 90% level of confidence and a 10% error tolerance, which means they are statistically reliable.

Results:

- The overall level of satisfaction among the clients of Pochteca's Raw Materials division is 90.4.
- The level of satisfaction among customers of Pochteca Paper is an overall 81.2.

Based on the above mentioned, and based on the areas of opportunity detected, we have developed action plans that are currently being applied.

We provide a number of channels through which clients can express their opinions:

- E-mail to:
 - » sales@pochteca.com.mx
 - » mercadotecnica@pochteca.com.mx
- which are answered and channeled by Marketing

- Social networks for raw materials and paper (Facebook, Twitter, LinkedIn)
- Toll-free numbers for paper, raw materials and lubricants
- Switchboard phone numbers for various corporate offices, plants and branches
- Contact form on the webpage at www.pochteca.com.mx

G4-DMA CUSTOMER PRIVACY
G4-PR8

In keeping with the Federal Law on Protection of Personal Data Held by Third Parties, we created a Privacy Committee, whose initial purpose was to develop an action plan and oversee its implementation, in order to address vulnerabilities detected in a diagnosis of client privacy procedures conducted in 2015 by an independent firm.

The goal of this committee, once the committed actions have been implemented, is to focus attention and follow up on reports that may be presented by any stakeholder in accordance with our privacy policies for clients, suppliers, job candidates and employees, which can be viewed on our website at:

www.pochteca.com.mx

G4-PR9

To date we have received no reports of incidents or non-compliance regarding the supply and use of our products and services.

CORPORATE GOVERNANCE

G4-34

Our Board of Directors is composed of a maximum of 21 proprietary members, decided by the Ordinary General Shareholders’ Meeting, and at least 25% of these, must be independent. As of today, seven of the 11 members are independent board members, thereby exceeding this legal requirement. In addition, the Board of Directors elects a Secretary who is not a member of the Board. The Board is supported by an Audit Committee and a Corporate Practices Committee.

ANALYSIS OF MANAGEMENT RESULTS

CEO REPORT ON 2016 RESULTS

SALES, EARNINGS AND GROSS MARGINS

- Sales were practically unchanged from 2015. Consolidated sales increased by only 1% for the year. While the 19% depreciation of the Mexican peso relative to the US dollar helped to increase the peso amount of revenues from the sale of products which we sell in dollars, the decline in our dollar sales prices was greater than the peso devaluation, so we have yet to emerge from the deflationary process that got underway in 2015. The weakness of industrial activity in Brazil adversely affected our sales because industrial activity is the main driver of our business in Brazil. In Mexico, illiquidity in the oil and gas sector has reduced the payment capacity of participants in that industry. For that reason we have prioritized risk reduction and protecting working capital in that sector, something that has lowered our sales to oil and gas companies. It is important to mention that oil and gas constituted our main market, along with mining, up until 2016. Unfortunately, these sectors have seen a major reduction in activity, and, as a result, in their need for inputs.
- Gross profit decreased by 3%, falling from Ps 1.11 billion pesos in 2015 to Ps 1.08 billion, primarily due to the negative effects on the sales margin in Brazil.
- Our gross margin narrowed 70 basis points (bp) to 17.5% primarily due to the effect of the Brazilian currency revaluation. Our gross margin in Brazil fell 250bp in 2016. Over the course of the year the Brazilian real revalued 19% in relation to the US dollar from 4.04 reais at the beginning of the year to 3.26 at the end of December 2016. This revaluation's adversely pressured our gross margin in Brazil as inventories that were purchased at higher exchange rates had to be sold at lower exchange rates. Should t the Brazilian exchange rate remain at current levels, we would expect our Brazil gross margin to gradually recover to its historical highs.

2015		2016
18.2%	Gross margin	17.5%

OPERATING INCOME AND EBITDA

- Operating income decreased 48% in 2016, falling from Ps 223 million in 2015 to Ps 116 million. Operating margin was 1.9%, which was 180 basis points lower than in 2015. The weak performance of Brazil, which recorded an operating loss for 2016, was the main cause of the decline in our consolidated operating income. Operating income was off by 48% for the full year. EBITDA decreased 27% compared to 2015 while EBITDA margin fell 160 basis points to 4.0%.
- Operating expenses (excluding depreciation) increased 8% compared to 2015. Expenses as a percentage of sales increased from 12.6% in 2015 to 13.5% in 2016. The main impact was generated by inflation in Brazil as a considerable part of expenses in the Brazilian economy are indexed and, as a result, are driven higher by inflation. Similarly, the 45% year on year revaluation of the real against the peso, which took the Mexican currency from 4.36 to 6.33 pesos per real, raised by the same percent expenses in Brazil when we convert our results to pesos. Unfortunately, sales in Brazil have undergone a contraction, thereby accentuating the effect of both of these variables on expenses as a percentage of sales.
- During 2016 we incurred Ps 32 million in extraordinary / non-recurring expenses. Excluding these expenses, the percentage of expenses to sales would have been 12.9% for the year. The items registered as part of our non-recurring expenses included the following:
 - » Labor fraud backed by the government of Quintana Roo state: \$6 million
 - » Labor fraud in Monterrey, Nuevo Leon: \$4 million
 - » Layoffs in Mexico: \$6 million
 - » Layoffs in Brazil: \$2 million
 - » Due diligence for contemplating possible acquisitions: \$6 million

2015		2016
12.6%	Expenses / Sales	13.5%

FINANCIAL EXPENSE AND NET INCOME

- Net interest expense decreased 18% year on year during 2016. Bank debt at the end of 2016 totaled Ps 873 million, 7% lower than in 2015. Interest expense will be greater during 2017 as interest rates have risen in Mexico. To be more specific, between December 2015 and the end of 1Q17, Banco de México raised its reference lending rate by 325 bp.
- Pochteca registered a Ps 6 million net loss after having posted a Ps 34 million net profit in 2015. The 48% decline in operating income was the main factor underpinning the net loss for the year. The negative impact of the drop in operating income offset the benefits of reduced expenses and foreign exchange losses in 2016 (the latter was 47% less than the Ps 94 million forex loss of 2015).

NET DEBT AND LEVERAGE METRICS

- Net debt at the end of 2016 totaled Ps 728 million, 31% or Ps 174 million greater than at the end of 2015. The revaluation of the Brazilian real relative to the Mexican peso was responsible for part of the increase in our net debt, which we report in pesos.
 - » During 2016, Coremal's net debt increased 7% in reais, rising from 46.8 million to 49.9 million.
 - » The peso/real exchange rate depreciated 45% during that same period from 4.36 to 6.33 pesos per real.
 - » As a result of that movement, Coremal's net debt increased 55% in pesos climbing from Ps 204 million to PS 316 million.
 - » In addition, during 2016 we amortized bank debt in Mexico for Ps 140 million.
- Net Debt to EBITDA increased to 2.9 times in 2016 from 1.6 times at the

end of 2015. The most recent level is above our internal policy of not surpassing 2 times and is the result of EBITDA being weaker than we had anticipated as well as an increase in Coremal debt as expressed in pesos in response to the revaluation of the Brazilian currency. We are confident that the combination of the reduction in expenses achieved through corporate restructuring, the gradual recovery in Brazil, and the absence of the non recurring expenses incurred in 2016 will allow EBITDA to recover to levels better than those of 2015, and that this metric will return to our target range levels.

- In 2016 interest coverage (EBITDA / interest) was 2.6 times. This indicator is below the 2015 level of 3.0 times.
- We will remain focused on cash flow generation by means of a strict management of working capital, as well as the cost and expense controls necessary for strengthening EBITDA.

	2016	2015
Gross debt (Ps million)	873	940
Net debt (Ps million)	728	554
Net debt / EBITDA 12 M	2.9x	1.6x
Interest coverage	2.6x	3.0x
Outstanding shares	130,522,049	130,522,049

CORPORATE RESTRUCTURING

G4-34

During 2016 we modified the company's corporate structure to lower its operating expenses and more efficiently align the commercial area with that of operations.

We made the following management changes:

1. **Francisco Martínez**, who was Director of Sales and Branches and who has been at Pochteca for more than 10 years, was appointed Operations Director.
2. **Eugenio Floresgómez**, formerly Director of the Chemicals Division and who has more than six years' experience in the company, took over the position of Director of Sales and Branches.
3. **Carlos Cepeda**, who has been with Pochteca for seven years, became Director of Product Segments (excluding Paper and Lubricants) a newly created position. He was previously Director of the Food Chemicals Division.
4. **Silvio Zapata**, who was Director of Lubricants for Latin America, assumed the responsibility for the entire Lubricants division, including Mexico and Latin America, which were merged. He has worked at the Company for six years.
5. We merged the IT and the Business Intelligence departments. **Ricardo Orozco**, who has been with Pochteca for four years, was appointed Director of IT & Business Intelligence.

Grupo Pochteca, S. A. B. de C. V. and Subsidiaries

CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2016, 2015 AND 2014, AND INDEPENDENT AUDITORS' REPORT DATED APRIL 12, 2017

Independent Auditors’ Report	64
Consolidated Statements of Financial Position	68
Consolidated Statements of Income and Other Comprehensive Income	70
Consolidated Statements of Changes in Stockholders’ Equity	72
Consolidated Statements of Cash Flows	74
Notes to the Consolidated Financial Statements	76

INDEPENDENT AUDITORS’ REPORT

To the Board of Directors and Stockholders
of Grupo Pochteca, S. A. B. de C. V. and Subsidiaries

Opinion

We have audited the consolidated financial statements of Grupo Pochteca, S. A. B. de C. V. and its subsidiaries (the “Group”) which comprise the consolidated statements of financial position as of December 31, 2016, 2015 and 2014, and the consolidated statements of income and other comprehensive income, consolidated statements of changes in stockholders’ equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2016, 2015 and 2014, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audits in accordance with International Standards on Auditing (ISA). Our responsibilities under those standards are further described in the Auditor’s responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) together with the Code of Ethics issued by the Mexican Institute of Public Accountants (IMCP Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code and with the IMCP Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined that the matters described below are the key audit issues which should be communicated in our report.

Impairment of Goodwill

The Group has identified several cash-generating units related to the business combinations which are shown as goodwill in the consolidated statements of financial position. An impairment analysis is performed on a yearly basis, which considers tangible and intangible assets as required by IAS 36 “Impairment of Assets”. Under this standard, discounted future cash flows are calculated in order to determine whether the asset value has been impaired. There is a risk that the determination of the assumptions used by management to calculate the discounted future cash flows might not be reasonable considering the current and projected circumstances of the Group.

Our audit procedures included, among others:

- i) Involve our internal specialists to:
 - Critically evaluate whether the model used by management to calculate the value in use of the individual cash-generating units complies with the requirements of IAS 36.
 - Evaluate the reasonableness of the assumptions used by the Group to determine the proper discount rates in each case.
 - Review that the projected cash flows are consistent with the historical audited information, and that any the effects of any non-recurring items that are not consistent with our understanding of the operations of the Group are properly excluded.
 - Selectively, recalculate the projections to test the amounts
- ii) Testing internal controls and substantive procedures related to the information used to build the financial model that determines the recoverable amount of the cash-generating units.
- iii) Examine the methodology and reasoning of the Group’s management in the impairment analysis, and conclude that the assumptions used are comparable to the historical performance and the projected circumstances of the Group as well as the discount rates used were appropriate in the circumstances.

The results of our audit procedures were reasonable. In addition, we did not note evidence of impairment that require adjustment to the Group’s reported goodwill balance.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report that the Group is obligated to prepare in accordance with the Article 33, Section I, Subsection b) of the fourth title, First Chapter of the General Rules Applicable to Securities Issuers and Other Participants of the Mexican Stock Market and the accompanying Manual of those legal provisions (the Legal provisions). The annual report is expected to be made available to us after the date of this auditor’s report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Galaz, Yamazaki, Ruiz Urquiza, S. C.
Member of Deloitte Touche Tohmatsu Limited

Acquisition of subsidiaries		(40,951)	(11,857)	(104,601)
Interest collected		14,901	14,893	12,262
Other investments		–	–	279
Net cash used in investing activities		(80,430)	(56,492)	(155,371)

	Notes	2016	2015	2014
Cash flows from financing activities:				
Borrowings	14	205,996	58,778	948,464
Repayment of loans received	14	(354,216)	(26,222)	(804,555)
Payment of financial leasing		(41,107)	(25,645)	(3,990)
Purchase of own common shares		9,246	(10,279)	(16,077)
Interest and commissions paid		(78,525)	(68,443)	(116,213)
Issuance and payment of common stock		3,213	3,935	887
Net cash (used in) provided by financing activities		(255,393)	(67,876)	8,516
Effects of changes in exchange rates on cash held in foreign currency		10,201	(78,640)	(25,904)
Net (decrease) increase in cash and cash equivalents		(240,873)	61,214	143,087
Cash and cash equivalents at beginning of year		385,672	324,458	181,371
Cash and cash equivalents at end of year		\$ 144,799	\$ 385,672	\$ 324,458

The accompanying notes are part of the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2016, 2015 AND 2014
(IN THOUSANDS OF MEXICAN PESOS)

1. ACTIVITIES AND SIGNIFICANT EVENTS

Activity

Grupo Pochteca, S. A. B. de C. V. and Subsidiaries (the “Entity”, or the “Group”) operates in Mexico and Brazil and its main activities are comprised of trading raw materials for the chemical, coating, plastics and food industries, as well as the processing and marketing of paper, cardboard and products for graphic arts. The offices are located at Manuel Reyes Veramendi #6, Colonia San Miguel Chapultepec, Delegación Miguel Hidalgo, Ciudad de México, 11850.

Significant events

- a. *Refinancing of syndicated debt* – As mentioned in Note 27, on March 30, 2017 the Entity obtained a new financing in the amount of \$875 million in order to refinance the debts described in the Note 14.

2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS

- a) *Application of new and revised International Financing Reporting Standards (“IFRSs” or “IAS”) and interpretations that are mandatorily effective for the current year*

In the current year, the Group has applied a number of amendments to IFRSs and new Interpretation issued by the International Accounting Standards Board (“IASB”) that are mandatorily effective for an accounting period that begins on or after January 1, 2016.

Amendments to IAS 16 and IAS 38 Clarification of Acceptable Methods of Depreciation and Amortization

The amendments to IAS 16 prohibit entities from using a revenue-based depreciation method for items of property, plant and equipment. The amendments to IAS 38 introduce a rebuttable presumption that revenue is not an appropriate basis for amortization of an intangible asset. This presumption can only be rebutted in the following two limited circumstances:

- a) When the intangible asset is expressed as a measure of revenue; or
- b) When it can be demonstrated that revenue and consumption of the economic benefits of the intangible asset are highly correlated.

The amendments apply prospectively for annual periods beginning on or after January 1, 2016. Currently, the Group uses the straight-line method for depreciation and amortization for its property, plant and equipment, and intangible assets respectively.

The management of the Group believes that the straight-line method is the most appropriate method to reflect the consumption of economic benefits inherent in the respective assets and accordingly, the application of these amendments to IAS 16 and IAS 38 did not have an impact on the Group’s consolidated financial statements.

Annual Improvements to IFRSs 2012–2014 Cycle

The Annual Improvements to IFRSs 2012–2014 Cycle include a number of amendments to various IFRSs, which are summarised below.

The amendments to IFRS 5 introduce specific guidance in IFRS 5 for when a Group reclassifies an asset (or disposal group) from held for sale to held for distribution to owners (or vice versa). The amendments clarify that such a change should be considered as a continuation of the original plan of disposal and hence requirements set out in IFRS 5 regarding the change of sale plan do not apply. The amendments also clarifies the guidance for when held-for-distribution accounting is discontinued.

The amendments to IFRS 7 provide additional guidance to clarify whether a servicing contract is continuing involvement in a transferred asset for the purpose of the disclosures required in relation to transferred assets.

The amendments to IAS 19 clarify that the rate used to discount post-employment benefit obligations should be determined by reference to market yields at the end of the reporting period on high quality corporate bonds. The assessment of the depth of a market for high qualify corporate bonds should be at the currency level (i.e. the same currency as the benefits are to be paid). For currencies for which there is no deep market in such high quality corporate bonds, the market yields at the end of the reporting period on government bonds denominated in that currency should be used instead.

The application of these amendments had no material effect on the Group’s consolidated financial statements.

- b) *New and revised IFRSs in issue but not yet effective*

The Group has not applied the following new and revised IFRSs that have been issued but are not yet effective:

IFRS 9	Financial Instruments ²
IFRS 15	Revenue from Contracts with Customers ²
IFRS 16	Leases ³
Amendments to IAS 12	Income taxes ¹
Amendments to IAS 7	Statements of Cash Flows ¹
Amendments to IFRS 2	Classification and measurement of share-based payments ²

- ¹ Effective for annual periods beginning on or after 1 January 2017, with earlier application permitted.
- ² Effective for annual periods beginning on or after 1 January 2018, with earlier application permitted.
- ³ Effective for annual periods beginning on or after 1 January 2019, with earlier application permitted.

IFRS 9 *Financial Instruments*

IFRS 9 issued in November 2009 introduced new requirements for the classification and measurement of financial assets. IFRS 9 was subsequently amended in October 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition and in November 2014 to include the new requirements for general hedge accounting. Another revised version of IFRS 9 was issued in July 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a 'fair value through other comprehensive income' (FVTOCI) measurement category for certain simple debt instruments.

Key requirements of IFRS 9:

- All recognized financial assets that are within the scope of IAS 39 *Financial Instruments: Recognition and Measurement* are required to be subsequently measured at amortized cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of subsequent accounting periods.

Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are generally measured at FVTOCI. All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under IFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognized in net income (loss).

- With regard to the measurement of financial liabilities designated as of fair value through profit or loss, IFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under IAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.
- In relation to the impairment of financial assets, IFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under IAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognized.
- The new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in IAS 39. Under IFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about a Group's risk management activities have also been introduced.

The management of the Group anticipates that the application of IFRS 9 in the future may have a material impact on amounts reported in respect of the Group's financial assets and financial liabilities. However, it is not practicable to provide a reasonable estimate of the effect of IFRS 9 until the Group undertakes a detailed review.

IFRS 15 *Revenue from Contracts with Customers*

In May 2014, IFRS 15 was issued which establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. IFRS 15 will supersede the current revenue recognition guidance including IAS 18 Revenue, IAS 11 Construction Contracts and the related Interpretations when it becomes effective.

The core principle of IFRS 15 is that a Group should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognize revenue when (or as) the Group satisfies a performance obligation

Under IFRS 15, a Group recognizes revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in IFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by IFRS 15.

The management of the Group anticipates that the application of IFRS 15 in the future may have a material impact on the amounts reported and disclosures made in the Group's consolidated financial statements. However, it is not practicable to provide a reasonable estimate of the effect of IFRS 15 until the Group performs a detailed review.

IFRS 16, *Leases*

IFRS 16 "Leases" was issued in January 2016 and supersedes IAS 17 "Leases" and related interpretations. The new standard brings most leases on-balance sheet for lessees under a single model, eliminating the distinction between operating and finance leases. Lessor accounting, however, remains largely unchanged and the distinction between operating and finance leases is retained. IFRS 16 is effective for periods beginning on or after 1 January 2019, with earlier adoption permitted if IFRS 15 'Revenue from Contracts with Customers' has also been applied.

Under IFRS 16 a lessee recognizes a right-of-use asset and a lease liability. The right-of-use asset is treated similarly to other non-financial assets and depreciated accordingly and the liability accrues interest. This will typically produce a front-loaded expense profile (whereas operating leases under IAS 17 would typically have had straight-line expenses) as an assumed linear depreciation of the right-of-use asset and the decreasing interest on the liability will lead to an overall decrease of expense over the reporting period.

The lease liability is initially measured at the present value of the lease payments payable over the lease term, discounted at the rate implicit in the lease if that can be readily determined. If that rate cannot be readily determined, the lessee shall use their incremental borrowing rate.

However, a lessee may elect to account for lease payments as an expense on a straight-line basis over the lease term for leases with a lease term of 12 months or less and containing no purchase options (this election is made by class of underlying asset); and leases where the underlying asset has a low value when new, such as personal computers or small items of office furniture (this election can be made on a lease-by-lease basis).

IFRS 16 establishes different transitional provisions, including retrospective application or the modified retrospective application where the comparative period is not restated.

The Group is in the process of determining the potential impacts that will derive from the adoption of this standard in its consolidated financial statements, although given the nature of its operations it would not expect significant impacts.

Amendments to IAS 12 Income Tax: *Recognition of Deferred Tax Assets for Unrealized Losses*, clarify how to account for deferred tax assets related to debt instruments measured at fair value.

IAS 12 provides requirements on the recognition and measurement of current or deferred tax liabilities or assets. The amendments clarify the requirements on recognition of deferred tax assets for unrealized losses, to address diversity in practice.

Entities are required to apply the amendments for annual periods beginning on or after 1 January 2017. Earlier application is permitted.

The management of the Entity does not expect significant impacts a result of these amendments.

Amendments to IAS 7 Statements of Cash Flows: *Provide disclosures*.

The amendments in disclosure initiative (Amendments to IAS 7) come with the objective that entities shall provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities.

To achieve this objective, the IASB requires that the following changes in liabilities arising from financing activities are disclosed (to the extent necessary): (i) changes from financing cash flows; (ii) changes arising from obtaining or losing control of subsidiaries or other businesses; (iii) the effect of changes in foreign exchange rates; (iv) changes in fair values; and (v) other changes.

Entities are required to apply the amendments for annual periods beginning on or after 1 January 2017. Earlier application is permitted.

The management of the Group expects that there may be some impacts a result of these amendments.

Amendments to IFRS 2 Share-based Payment

The amendments to IFRS 2 Share-based Payment, clarify the classification and measurement of share-based payment transactions. The amendments contains clarifications and amendments address to the accounting for cash-settled share-based payment transactions; classification of share-based payment transactions with net settlement features; and accounting for modifications

of share-based payment transactions from cash-settled to equity-settled. These amendments are effective for annual periods beginning on or after 1 January 2018. Earlier application is permitted. The amendments apply prospectively.

The management of the Group expects that there may be some impacts a result of these amendments.

3. SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with IFRS as issued by the IASB.

b. Basis of presentation

The consolidated financial statements have been prepared on the historical cost basis, except for the revaluation of properties and lands at a fair value, as explained in the accounting policies below:

i. Historical cost

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

ii. Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly and,
- Level 3 inputs are unobservable inputs for the asset or liability.

c. Basis of consolidation of financial statements

The consolidated financial statements incorporate the financial statements of the Entity and its subsidiaries controlled by it. Control is achieved when the Entity:

- Has power over the investee;
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Entity has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Entity considers all relevant facts and circumstances in assessing whether or not the Entity’s voting rights in an investee are sufficient to give it power, including:

- The size of the Entity’s holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Entity, other vote holders or other parties;
- Rights arising from other contractual arrangements; and
- Any additional facts and circumstances that indicate that the Entity has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders meetings.

Consolidation of a subsidiary begins when the Entity obtains control over the subsidiary and ceases when the Entity loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Entity gains control until the date when the Entity ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Entity and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Entity and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those of the Group’s accounting policies:

Subsidiary	Main activity	Functional currency
Pochteca Materias Primas, S. A. de C. V.	Trading of raw materials	Mexican pesos
Suplia, S. A. de C. V.	Trading of raw materials	Mexican pesos
Demser, S. A. de C. V.	Professional services	Mexican pesos
Servicios Administrativos Argostal, S. A. de C. V.	Professional services	Mexican pesos
Pochteca de Guatemala, S. A.	Trading of raw materials	Guatemalan quetzales
Pochteca Do Brasil Participações Ltd.	Trading of raw materials	Brazilian reais
Pochteca Papel, S. A. de C. V.	Trading of paper	Mexican pesos
Transportadora de Líquidos y Derivados, S. A.	Transportation of chemical products	Mexican pesos
Pochteca de El Salvador, S. A.	Trading of raw materials	US Dollars
Pochteca de Costa Rica, S. A.	Trading of raw materials	Costa Rican colon
Pochteca Servicios Administrativos, S. A. de C. V.	Professional services	Mexican pesos
Pochteca Servicios Corporativos, S.A. de C.V.	Professional services	Mexican pesos
Asesoría en Lubricantes Pochteca, S. A de C. V.	Professional services	Mexican pesos
Asesoría en Servicios Pochteca, S. A de C. V.	Professional services	Mexican pesos
Plásticos Argostal, S. A. de C. V.	Without operations	Mexican pesos
Químicos Argostal, S. A. de C. V.	Without operations	Mexican pesos
Comercio e Representações Maia Ltda.	Trading of raw materials	Brazilian reais
Mecotrans Tansportes e Logistica Ltda.	Transportation of chemical products	Brazilian reais
Coremal Química Ltda.	Trading of raw materials	Brazilian reais
Latam Chemicals, LLC	Trading of raw materials	Dólares

Participation in investments in all subsidiaries is 100% of its share capital.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Group.

When the Group loses control of a subsidiary, a gain or loss is recognized in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Entity had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/ permitted by applicable IFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

d. *Conversion of the financial statements of foreign subsidiaries*

The individual financial statements of each of the Group's subsidiaries are prepared in the currency of the primary economic environment in which the Group operates (its functional currency). For the purposes of these consolidated financial statements, the results and financial position of each entity are expressed in Mexican pesos, the Group's functional currency, as well as the presentation currency of the consolidated financial statements.

For consolidation purposes, the recording currency used for the financial statements of foreign subsidiaries is modified to enable their presentation according to IFRS. The financial statements are converted to Mexican pesos by using the following methodology:

Foreign entities that use the same recording and functional currency convert their financial statements by utilizing the following exchange rates: 1) the close exchange rate for assets and liabilities; 2) the historical exchange rate for stockholders' equity, and 3) the average exchange rates in effect during the period unless fluctuating significantly, in which case the exchange rates in effect on transaction dates are used for income, costs and expenses. If applicable, exchange rate differences are recognized in other comprehensive income and accrued to stockholders' equity.

e. *Reclassifications*

The consolidated financial statements as of December 31, 2014 incorporate certain modifications including the reclassification of "Investment property" from current assets to non-current assets and changes in presentation related to the reserve for repurchase of shares in the consolidated statements of changes in stockholders' equity.

For the year 2015, the Group has defined the classification of "Investment property" as non-current assets because the sales effort will be managed over the long term. Although as of December 31, 2014, all conditions were fulfilled to maintain the property as a current asset, it was reclassified to long-term in the consolidated statement of financial position for comparative purposes.

Also, the presentation of the movements in the reserve for repurchase of shares in 2014 has been changed such that they are now identified separately instead of on a cumulative basis. The amortization of commissions paid on loans is presented separately in the consolidated statements of cash flows.

f. *Financial instruments*

Financial assets and financial liabilities are recognized when a group entity becomes a party to the contractual provisions of the instruments

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

g. *Financial assets*

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

1. Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as of FVTPL.

2. Financial assets at FVTPL

Financial assets are classified as of FVTPL when the financial asset is either held for trading or it is designated as of FVTPL.

A financial asset is classified as held for trading if:

- It has been acquired principally for the purpose of selling it in the near term; or
- On initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- It is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as of FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- The financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- It forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract to be designated as of FVTPL.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'other income (expenses) – Net' line item. Fair value is determined in the manner described in note 3b.

3. Financial assets classified as available-for-sale (AFS financial assets)

AFS financial assets are non-derivatives that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss.

Listed redeemable notes held by the Group that are traded in an active market are classified as AFS and are stated at fair value at the end of each reporting period. The Group also has investments in unlisted shares that are not traded in an active market but that are also classified as AFS financial assets and stated at fair value at the end of each reporting period (because the Entity's management consider that fair value can be reliably measured). Fair value is determined in the manner described in Note 2b. Changes in the carrying amount of AFS monetary financial assets relating to changes in foreign currency rates (see below), interest income calculated using the effective interest method and dividends on AFS equity investments are recognized in profit or loss. Other changes in the carrying amount of assets classified as held for sale are recognized in other comprehensive income and accumulated under the heading of investments revaluation reserve. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss.

Dividends on AFS equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established.

The fair value of AFS monetary financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate prevailing at the end of the reporting period. The foreign exchange gains and losses that are recognized in profit or loss are determined based on the amortized cost of the monetary asset. Other foreign exchange gains and losses are recognized in other comprehensive income.

4. Loans and accounts receivable

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including [trade and other receivables, bank balances and cash, and others [describe]]) are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short, term receivables when the effect of discounting is immaterial.

5. Allowance for bad debts:

Tests are applied to accounts receivable from customers to determine their impairment at the end of each period. These amounts are considered to be impaired when objective evidence is obtained to the effect that, as a result of one or more events arising after their recognition, the estimated future cash flows of the financial asset have been affected. Objective evidence of impairment may include: i) the customer's financial difficulties; ii) customer noncompliance as regards the payment of invoices; iii) the customer has either started bankruptcy proceedings or a financial reorganization process; or iv) observable changes in national and local economic conditions which are correlated with payment default. Accounts receivable from customers that have not undergone individual impairment are included in the impairment evaluation performed on a collective basis.

h. *Cash and cash equivalents*

Cash includes bank deposits and checking accounts and cash equivalents in short-term investments, highly liquid and easily convertible into cash, which are subject to insignificant value change risks. Cash is stated at nominal value and cash equivalents are presented at fair value. Fluctuations in value are recognized in income as they accrue.

i. *Inventories and cost of sales*

Inventories are stated at the lower of cost and net realizable value. Costs of inventories are determined on a first-in-first out basis. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

j. *Property, plant and equipment*

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of each reporting period.

Any increase in the revaluation of such land and buildings is recognized in other comprehensive income and accumulated in equity, except if it reverses a revaluation decrease of the same asset previously recognized in profit or loss, in which case the increase is credited to income as it reduces spending by the decrease previously made.

A decrease in carrying amount that originated from the revaluation of such land and buildings is recorded in income to the extent it exceeds the balance, if any, of the revaluation reserve of property related to a previous revaluation of that asset.

The machinery and equipment are carried at cost less any accumulated depreciation or impairment loss.

An item of property and equipment is derecognized when sold or when no expected future economic benefits arising from the continued use of the asset. The gain or loss arising from the sale or retirement of an item of property and equipment is calculated as the difference between the resources received from the sale and the carrying amount of the asset and is recognized in income.

Depreciation of these assets, as well as other properties, begins when the assets are ready for their intended use. Depreciation is calculated under the straight-line method based on estimated useful lives of the assets. The average years of useful lives used to calculate depreciation in 2016, 2015 and 2014 are as follows:

	Average years
Buildings	50 and 20
Machinery and equipment	10
Vehicles and allied equipment	4 and 15
Office furniture and equipment	10
Computers	3.3
Leasehold improvements	3

The gain or loss arising from the sale or retirement of an item of property, plant and equipment is calculated as the difference between the resources received from sales and the carrying amount of the asset and is recognized in results.

k. Investment property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. All of the Group's property interests held under operating leases to earn rentals or for capital appreciation purposes are accounted for as investment properties and are measured using the fair value model. Gains and losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.

An investment property is derecognized upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized

l. Other investments

Are recognized at cost. Corresponds to the share in Unión de Crédito de la Industria Litográfica, S. A. de C. V. and Club de Industriales, A. C.

m. Other assets

They are valued at cost and are primarily represented by security deposits for leases on truck tractors.

n. Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquire and the equity interests issued by the Group in exchange for control of the acquire. Acquisition-related costs are generally recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value, except that:

- Deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognized and measured in accordance with IAS 12 *Income Taxes* and IAS 19 respectively;
- Liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquire are measured in accordance with IFRS 2 at the acquisition date; and
- Assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquire (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquire and the fair value of the acquirer's previously held interest in the acquire (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognized in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognized in profit or loss.

Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

o. *Intangible assets*

Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

The Group has intangible assets with definite and indefinite useful lives which are disclosed in the Note 11.

p. *Goodwill*

The goodwill generated by a business acquisition is recognized as an asset at the date on which control is acquired (see Note 12); it refers to the amount by which the transferred payment exceeds fair value at the acquisition date of identifiable acquired assets and assumed liabilities.

In order to test for impairment, goodwill is assigned to each of the Group's cash generating units (or groups of cash generating units) which is expected to benefit from the combination of synergies.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

q. *Impairment of tangible and intangible assets other than goodwill*

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

r. *Financial liabilities and equity instruments*

Financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial liabilities are valued initially at fair value. Transaction costs which are directly attributable to the acquisition or issuance of financial liabilities (different from financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial liabilities, as the case may be, in the initial recognition. The transaction costs directly attributable to the acquisition of financial liabilities at fair value through profit or loss are recognized immediately in results.

– Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements.

– Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of a Group after deducting all of its liabilities. Group instruments issued by the Entity are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Group's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

– Financial liabilities

Financial liabilities are classified as financial liabilities at fair value through profit and loss or other financial liabilities.

– Financial liabilities at FVTPL

Financial liability at fair value through profit or loss is a financial liability that is categorized as held for trading or designated as at fair value through profit or loss.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on measurement recognized in profit or loss.

The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'financing cost' line item.

Other financial liabilities

Other financial liabilities (including borrowings and trade and other payables) are subsequently measured at amortized cost using the effective interest method.

– Derecognition of financial liabilities

The Group recognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

s. *Derivative financial instruments*

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in Note 18.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

t. *Employee benefits*

Direct employee benefits are calculated based on the services rendered by employees, considering their most recent salaries. The liability is recognized as it accrues. These benefits include mainly statutory employee profit sharing PTU payable, compensated absences, such as vacation and vacation premiums, and incentives and it is shown in the account payable and accrued liabilities.

u. *Retirement benefit costs*

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at the end of each reporting period. Actuarial gains and losses that exceed 10% of the greater of the present value of the Group's defined benefit obligation and the fair value of plan assets as at the end of the prior year are amortized over the expected average remaining working lives of the participating employees.

Past service cost is recognized immediately to the extent that the benefits are already vested, and otherwise is amortized on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognized in the consolidated statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses and unrecognized past service cost, and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

v. *Statutory employee profit sharing (PTU)*

PTU is recorded in the profit or loss of the year in which it is incurred and presented under other income and operating expenses in the accompanying consolidated statements of income and other comprehensive income.

w. *Stock option plan for key executives*

The Group has created an investment and administration trust to which it contributed the amount of \$33,085 to acquire 22,056,811 shares of Grupo Pochteca, S. A. B. de C. V. at a price of one peso and fifty cents per share. During 2008, the Board of Directors approved this capital increase, whereby the Group treasury held 7,943,189 shares for subsequent use in the stock option plan for key executives. The shares were irrevocably assigned to certain Group officers and employees, who became trust beneficiaries. Likewise, the Group executives agreed to pay the value of the assigned shares within a three-year period.

During 2015, The Group created a Trust referred to as F/34. The Trust assets are comprised of the shares to be subscribed by investments trust management number F/34, for an amount of up to \$21,105 for the share purchase option plan for key executives. Trust grantors comprise several subsidiaries, the trustee is Banco Ve por Más, Sociedad Anónima, Institución de Banca Múltiple, Grupo Financiero Vé por Más and the trust beneficiaries include several executives. As of December 31, 2015, shares have not been assigned to beneficiaries of this trust. The shares to be acquired represent the capital of Grupo Pochteca, S. A. B. de C. V.

x. *Income taxes*

Income tax expense represents the sum of the tax currently payable and deferred tax.

– Current tax

Current income tax ("ISR") is recognized in the results of the year in which is incurred.

– Deferred income tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The Entity's management reviewed the Entity's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, management has determined that the 'sale' presumption set out in the amendments to IAS 12 is not rebutted. As a result, the Entity has not recognized any deferred taxes on changes in fair value of the investment properties as the Entity is not subject to any income taxes on the fair value changes of the investment properties on disposal.

– Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

y. *Provisions*

Provisions are recognized when the Entity has a present obligation (legal or constructive) as a result of a past event, it is probable that the Entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions are classified as current or non-current based on the estimated period of time to attend the obligations covered.

z. *Derivative financial instruments*

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in Note 19.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

aa. *Revenue recognition*

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

– Sale of goods

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- The Group has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Entity.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

– Interest income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Entity and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

bb. Classification of costs and expenses

Costs and expenses presented in the consolidated statements of income and other comprehensive income were classified according to their function separating the cost of sales from other costs and expenses.

cc. Earnings per share

Basic (losses) earnings per common share are calculated by dividing consolidated net income (loss) by the weighted average number of common shares outstanding during the year.

dd. Reserve for repurchase of shares

The acquisition of the Entity's own shares are shown as a decrease in the reserve for repurchase of shares included in the consolidated statements of financial position under the item, reserve for repurchase of shares and are valued at acquisition cost. The sales of shares made after the approval of the shareholders, results in an increase in the balance of the unused repurchase reserve, which relate to investments made in prior periods of amounts authorized by the Assembly.

4. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the accounting policies, the Group's management makes judgments, estimates and assumptions about certain amounts of assets and liabilities in the financial statements. The estimates and assumptions are based on experience and other factors considered relevant. Actual results could differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are critical accounting judgments and key sources of uncertainty in applying accounting policies, made at the date of the consolidated financial statements, which have a significant risk of deriving an adjustment to the carrying amounts of assets and liabilities during the next financial period, are as follows:

- a. Useful life of property, plant and equipment** – The Group reviews the estimated useful life of its property, plant and equipment at the end of each annual period. At the IFRS transition date, the Group management performed a detailed analysis to modify the estimated useful life and components of property, plant and equipment. The level of uncertainty associated with the estimation of these useful lives is related to market changes and asset utilization by production volumes and technological development.
- b. Allowance for doubtful accounts** – The Group uses estimates to determine the allowance for bad debts. The factors considered for this purpose primarily involve the risks derived from the customer's financial position, customer guarantees and collection delays.
- c. Realizable value of inventories** – The Group reviews the realizable value of its inventories at the end of each period. The factors considered by the Group to estimate its inventories are the sales prices of its products derived from changes in market demand.
- d. Provisions and contingencies** – At the end of 2016, there are many judgements in process related to labor matters promoted in various subsidiaries which were originated in development of operations. The legal advisors of the company and its directors consider that, given its nature and even as a whole, the outcome of litigation and claims will not represent a significant economic impact and will not produce a significant effect on the consolidated financial statements for the years in which they are settled.
- e. Foreign currencies** – In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings.
- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

For the purposes of presenting these consolidated financial statements, the assets and liabilities of the Entity's foreign operations are translated into Currency Units using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (and attributed to non-controlling interests as appropriate).

- f. *Fair value measurements and valuation processes* – Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The management of the Group determines the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified appraiser to perform the valuation.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in Note 17.

5. CASH AND CASH EQUIVALENTS

In the consolidated statements of cash flows, cash and cash equivalents include cash and banks and investments. Cash equivalents are presented mainly by investments in risk-free instruments. Cash and cash equivalents at end of period as shown in the consolidated cash flow statement can be reconciled to the related items in the consolidated statement of financial position as follows:

	2016	2015	2014
Cash	\$ 128,819	\$ 363,085	\$ 300,769
Investments	15,980	22,587	23,689
	\$ 144,799	\$ 385,672	\$ 324,458

6. ACCOUNTS RECEIVABLE AND RECOVERABLE TAXES

	2016	2015	2014
Trade accounts receivable	\$ 1,010,790	\$ 938,249	\$ 969,144
Allowance for doubtful accounts	(78,921)	(57,056)	(54,583)
	931,869	881,193	914,561
Recoverable taxes in Mexico	57,396	63,145	39,713
Recoverable taxes in Brazil	114,397	60,879	42,232
Other	48,392	45,441	30,892
	\$ 1,152,054	\$ 1,050,658	\$ 1,027,398

The accounts receivable from customers are valued at their applied cost.

The average credit period granted for goods sales is 60 days. The Entity does not charge interest on accounts receivable from customers. In the case of accounts receivable aged more than 120 days, the Entity recognizes an allowance for doubtful accounts by considering the unrecoverable amounts determined according to its experience with counterparty noncompliance.

The limits and ratings assigned to customers are reviewed annually. As of December 31, 2016, 71% of accounts receivable from customers which are not overdue or impaired have the highest credit rating according to the rating system used by the Entity.

The accounts receivable from customers disclosed in the preceding paragraphs include amounts which are overdue at the end of the reporting period, but for which the Group has not recognized an allowance for doubtful accounts because there has been no significant change in customer credit ratings and the amounts in question are still deemed to be recoverable.

Aging of accounts receivable past-due but recoverable

	2016	2015	2014
60–90 days	\$ 20,609	\$ 52,938	\$ 46,087
Greater than 90 days	45,501	54,842	64,694
Total	\$ 66,110	\$ 107,780	\$ 110,781

Change in allowance for doubtful accounts

	2016	2015	2014
Balance at beginning of the year	\$ 57,056	\$ 54,583	\$ 90,851
Provision for accounts deemed uncollectible during the year	19,031	15,454	13,244
Translation effects and accounts recovered during the year	2,834	(12,981)	(49,512)
Balance at end of the year	\$ 78,921	\$ 57,056	\$ 54,583

Aging of impaired accounts receivable

	2016	2015	2014
Over 120 days	\$ 78,921	\$ 57,056	\$ 54,583

7. INVENTORIES

	2016	2015	2014
Finished goods:			
Coatings, solvents and mixtures	\$ 8,440	\$ 9,139	\$ 255,544
Paper	101,815	136,512	172,668
Chemicals and plastics	404,502	388,923	106,903
Food products	190,827	155,580	144,282
Lubricants	132,717	114,803	225,252
	838,301	804,957	904,649
Allowance for slow moving inventory	(20,616)	(21,278)	(9,169)
	817,685	783,679	895,480
Merchandise-in-transit	37,620	46,937	14,837
	\$ 855,305	\$ 830,616	\$ 910,317

The allowance for slow moving inventory had been increased by \$2,957 in 2016, \$12,109 in 2015 and \$1,756 in 2014.

Inventories that were consumed and recognized in cost of sales from continuing operations amounted to \$4,846,153, \$4,806,422 and \$4,860,470 in 2016, 2015 and 2014, respectively.

8. INVESTMENT PROPERTIES

On December 31, 2016 and March 22, 2014, the Group received as payment in kind real properties for account receivables due from Solquimia, S. A. de C. V. and Agropur Lacpur, S. A. de C. V, respectively. At the date of the payment in kind, the balance receivable was \$2,333 and \$12,727, respectively. As the Group does not have any plans to make use of the property, management classifies it as an investment property, subject to the requirements established.

The fair value of the Group's investment property as of December 31, 2016 and 2015 has been determined in accordance with IFRS13.91 (a), 93 (d) on the basis of a valuation performed on the respective dates by an independent appraiser with the appropriate classifications and sufficient recent experience in the valuation of investment properties similar in nature and physical location to those of the Group. Fair value as of December 31, 2016 is \$25,325 and \$21,825 for 2015 and 2014, of which \$15,200 refers to the land in 2016, \$11,700 for 2015 and 2014 and \$10,125 to the construction. However, the Group has decided to maintain the property at its carrying amount and recognize potential income only when it is realized through the sale of the asset. As of December 31, 2016, 2015 and 2014 the Entity has not identified any indicators of impairment.

For the year 2015, the Entity has classified “Investment property” within non–current assets because the sales effort will be managed over the long term. Although as of December 31, 2014, all conditions were fulfilled to classify the property within current assets, it was reclassified to long–term assets in the consolidated statement of financial position for comparative purposes.

9. PROPERTY, PLANT AND EQUIPMENT

	Balances as of December 31, 2015	Additions	Disposals	Reclassifications and translation effects	Balances as of December 31, 2016
Investment:					
Land	\$ 198,357	\$ 196	\$ –	\$ 8,442	\$ 206,995
Building and constructions	532,714	26,964	(2,557)	54,820	611,941
Industrial machinery and equipment	388,053	17,402	(10,091)	14,016	409,380
Office furniture and equipment	49,957	1,750	(122)	3,263	54,848
Vehicle	163,284	6,502	(15,957)	35,572	189,401
Computers	56,772	5,713	(242)	5,833	68,076
Equipment acquired under financial leases	177,198	8,597	–	1,950	187,745
Total investments	1,566,335	67,124	(28,969)	123,896	1,728,386
Accumulated depreciation:

10. BUSINESS COMBINATIONS

In 2013, the Group acquired businesses that were recorded using the purchase method. The results of the acquired businesses were included in the consolidated financial statements since the acquisition date. The acquired businesses are as follows:

a. Subsidiaries acquired

	Principal activities	Acquisition date	Proportion of shares acquired (%)	Consideration transferred
Mardupol	Purchase and sale of raw materials ⁽¹⁾	February 1, 2013	100	\$ 155,227
Coremal	Purchase and sale of raw materials ⁽²⁾	December 31, 2013	100	492,457
				<u>\$ 647,684</u>

⁽¹⁾ On February 1, 2013, the Entity completed the acquisition of Productos Químicos Mardupol, S. A. de C. V. (Mardupol), a company engaged in the distribution of chemicals.

⁽²⁾ Coremal Ltda is a distributor of chemical products located in Recife, Brazil, with operations in 27 states of such country. Their principal offices are established in Sao Paulo, Brazil. The acquisition price was R\$88,935, equivalent to \$492,457 pesos, and was composed of an initial payment of \$49,903 mexican pesos, and contingent consideration that is determined by a formula established in the purchase-sale agreement, the payment of which is based on the achievement of certain EBITDA margins during annual periods between 2014 to 2019. As of December 31, 2016, 2015 and 2014 the liability payments have been \$40,951, \$11,857 and \$104,601, respectively.

As of December 31, 2013, the valuation of assets and liabilities assumed in connection with the acquisition of Coremal, was conducted using the information available at the date of issuance of these consolidated financial statements, however, certain adjustments were applied to such provisional amounts during the measurement period, as a result of obtaining additional information.

b. Consideration transferred

	Mardupol	Coremal
Consideration to be paid in cash	\$ 114,540	\$ 442,554

f. *Cash flows on acquisition of subsidiaries*

	Mardupol		Coremal	
Consideration paid in cash	\$	114,540	\$	–
Less: cash balances acquired		(3,360)		(28,479)
	\$	111,180	\$	(28,479)

The acquisition of Mardupol gave to the Group a physical presence in Ciudad Obregón and Ciudad Juárez, localities where it did not have operations, generating additional sales of \$53,494 and \$40,000 plus sales at December 31, 2014 and 2013 respect. Likewise, Mardupol brought a portfolio of pigments and colorants and products for the agro–business, sectors which the Group had practically never entered, adding \$31,300 and \$23,000 in sales in the year 2014 and 2013 respect. The water treatment sector, where the Group already had a presence, was strengthened also by the portfolio of Mardupol, increasing sales by \$40,000 and \$44,500 at December 31, 2014 and 2015 respect. Furthermore, the portfolio of products brought by leading suppliers such as Du Pont, Jones Hamilton, Eastman and Solvay helped to increase sales by \$110,000 and \$150,000 at December 31, 2014 and 2013 respect.

Generally speaking, chemicals and plastic segment, which includes the great majority of the products of Mardupol, increased sales from \$1,370,235 in 2013 to \$2,664,912, in 2014. A major part of this growth was due to the increased physical presence, the additional portfolio of products and suppliers, and the customers that were incorporated into the operation the Group with the acquisition of Mardupol.

11. INTANGIBLE ASSET

In accordance with the fair value analysis of assets and liabilities acquired in connection with the acquisition of Mardupol, a supplier relationship intangible asset was identified:

	2016		2015		2014	
Supplier relationship	\$	51,425	\$	51,425	\$	51,425
PEMEX relationship		–		–		280
Non–compete contract		99		149		198
Balances at end of year	\$	51,524	\$	51,574	\$	51,903

The supplier relationship intangible asset has an indefinite life. As of December 31, 2016, 2015 and 2014, the Group recorded amortization of \$50 and \$329 related to the PEMEX relationship and the Non–compete contract.

12. GOODWILL

	2016		2015		2014	
Balances at beginning of year	\$	366,097	\$	405,866	\$	457,605
Additional amounts recognized from business acquisitions that occurred during the year		–		–		35,000
Translation effect and adjustment for measurement of contingent liabilities		66,970		(39,769)		(86,739)
Balances at end of year	\$	433,067	\$	366,097	\$	405,866

In 1999, Tenedora Pochteca, S. A. de C. V. (currently the Company after its merger with Dermet de México, S. A. B. de C. V.) acquired 99.99% of the shares of Grupo Pochteca, S. A. de C. V. (currently Pochteca Papel, S. A. de C. V.) and its subsidiaries, thereby generating goodwill.

The Group has not identified or recognized the impairment losses of goodwill balances recorded at December 31, 2016, 2015 and 2014. Management did not observe any changes in the main hypotheses giving rise to goodwill impairment.

13. OTHER ACCOUNTS PAYABLE AND ACCRUED EXPENSES

	2016		2015		2014	
Liability from Coremal purchase	\$	218,609	\$	192,332	\$	251,215
Accounts payable		65,116		100,382		82,021
Liabilities for purchase of fixed assets ⁽¹⁾		–		–		24,283
Reserves		95,345		56,532		10,899
Other account payable		33,815		30,427		42,978
	\$	412,885	\$	379,673	\$	411,396
Short–term	\$	194,018	\$	169,606	\$	184,525
Long–term		218,867		210,067		226,871
	\$	412,885	\$	379,673	\$	411,396

⁽¹⁾ Short–term amounts are \$31 million and \$24 million, as of December 31, 2015 and 2014, respectively.

14. BANK LOANS AND LONG-TERM DEBT

The TIIE rates as of December 31, are as follows:

	2016	2015	2014
TIIE	6.110%	3.320%	3.790%

- a *Refinancing of syndicated debt* – On December 3, 2014, the Group entered into a refinancing agreement for the syndicated loan with HSBC and Grupo Financiero Inbursa, in which the following major changes were made: 1) to restore the maturity date of the loan to December 3,2018; 2) to remove Grupo Pochteca, S.A.B. de C.V. as creditor and to leave only PMP and PP as creditors, 3) to refinance the loan for \$ 610,000, of which HSBC and Inbursa provide an equal amount for \$305,000 and 4) modify the obligations of do and not do. In order to give effect to the refinancing of the credit, HSBC and Inbursa required the payment of accrued interest and principal generated at that date, so that the creditors could again the loan up to \$ 610,000 to the borrowers.
- b. As of December 31, 2016, 2015 and 2014, in accordance with the syndicated loan agreement with Banco Inbursa, S. A. and HSBC México the Entity is subject to certain obligations, restrictions and covenants, of which the most important are:
- The following financial ratios must be maintained at all times:
 - Interest Rate Hedge Ratio. An Interest Rate Hedge Ratio a) greater than 2.0 to 1.0 from the Close Date until and including June 30, 2015; and b) greater than 2.5 to 1.0 from and including December 31, 2015 and c) greater than 3.0 to 1.0 from and including January 1, 2016 from and including the maturity date.
 - Leverage Ratio. A Leverage Ratio of (a) less than 2.5 to 1.0 from the close date until and including March 31, 2015; (b) less than 2.75 to 1.0 from and including April 1, 2015 until and including December 31, 2015; and (c) less than 2.5 to 1.0 from and including January 1, 2016 until and including the maturity date.
 - Stockholders' Equity. Consolidated stockholders' equity of at least \$900,000.
 - The Entity must not sell, encumber, transfer, lease or in any other way dispose of its goods, rights or any other assets without the prior written consent of the Agent.
 - The Entity must not merge with third parties, split, transform itself or modify its common stock, corporate purpose or business activity in such a way as to generate a Substantial Adverse Change without the prior written authorization of the Agent.
 - The Entity must not create, grant or permit mortgages, pledges, trusts, distraint or any other kind of encumbrance or actual or personal guarantee in any place or to any extent as regards the entity, its goods, rights and other assets (except for acts performed during the normal course of business).
 - The obligors Pochteca Materias Primas, S. A. de C. V. (PMP) and Pochteca Papel, S. A. de C. V. (PP) must not perform transactions involving derivative financial instruments for speculative purposes or for reasons other than hedging.

- The Entity must not declare or pay dividends or distributions to its stockholders (including the reimbursement or amortization of shares) for an annual amount exceeding the equivalent of 10% of the consolidated earnings before financing, interest, depreciation and amortization (EBITDA) of the immediately preceding year.

As of December 31, 2016, 2015 and 2014, these restrictions have been complied with. Maturities of long term–debt at December 31, 2015, are:

Year ended as of December 31,	Amount
2018	\$ 366,627
2019	5,130
2020	218
	\$ 371,975

15. EMPLOYEE BENEFITS

Net period cost for obligations resulting from the pension plan, severance payments and seniority premiums was \$1,194, \$1,118 and \$906 in 2016, 2015 and 2014, respectively. Other disclosures required under IFRS are not considered important.

16. STOCKHOLDERS' EQUITY

On an annual basis, the shareholders of the Group determine the maximum amount to be earmarked for repurchase of shares, without exceeding the amount of the retained earnings at that date, refunding to retained earnings any previously authorized amount that has not been exercised. As of December 31, 2016, 2015 and 2014 the Entity maintained 2,178,700, 3,038,041 and 2,344,486 shares in treasury, respectively. Sales of shares made after the approval of the shareholders, increase the balance of the unused reserve, which relate to investments made in prior periods of amounts authorized by the Assembly.

- I. The Stockholders' Ordinary General Meeting of April 28, 2016 resolved to establish:
- A maximum amount of \$30,000 that the Entity may allocate to the purchase of its own shares or securities representing such shares, on the understanding that the acquisition and placement of shares will be made through the Bolsa Mexicana de Valores, S. A. B. de C. V. at market price.
- II. The common stock of the trust is represented by shares subscribed by investment and administration trust number F/147, which was created for the stock option plan for key executives. At December 31, 2016, 2015 and 2014, the outstanding portion payable by executives is \$7,884, \$11,097 and \$15,032, respectively, which is presented in stockholders' equity as shares held in trust. The value of contributed capital has therefore been reduced by this amount.

III. During 2015, The Entity created a Trust referred to as F/34. The Trust assets are comprised of the shares to be subscribed by investments trust management number F/34, for an amount up to \$21,105 for the share purchase option plan for key executives. Trust grantors comprise several subsidiaries, the trustee is Banco Ve por Más, Sociedad Anónima, Institución de Banca Múltiple, Grupo Financiero Ve por Más as trustee and the trust beneficiaries include several executives. As of December 31, 2016, shares have not been assigned to beneficiaries of this trust. The shares to be acquired represent the capital of Grupo Pochteca, S. A. B. de C. V.

IV. Common stock without par value as of December 31, is as follows:

	Number of Shares	Amount
Fixed capital Series "B"	9,487,842	\$ 80,304
Fixed capital Series "B"	121,034,207	1,024,417
Total	130,522,049	\$ 1,104,721

V. Mexican General Corporate Law requires that at least 5% of net income of the year be transferred to the legal reserve until the reserve equals 20% of capital stock at par value (historical pesos). The legal reserve may be capitalized but may not be distributed unless the entity is dissolved. The legal reserve must be replenished if it is reduced for any reason. As of December 31, 2016, 2015 and 2014, the Group has not set aside any amount to create such reserve.

VI. Stockholders' equity, except for restated paid-in capital and tax retained earnings, will be subject to ISR payable by the Entity at the rate in effect upon distribution. Any tax paid on such distribution may be credited against annual and estimated ISR of the year in which the tax on dividends is paid and the following two fiscal years.

Dividends paid from profits generated as of January 1, 2014 in Mexico resident and resident individuals abroad, may be subject to additional income tax of up to 10%, which should be retained by the Group.

17. FINANCIAL INSTRUMENTS

Capital risk management

The Group manages its capital to ensure that will continue as a going concern, while also maximizing the return to its stockholders through optimization of its debt amounts and capital structure. The Group is not under any type of restrictions imposed externally on respect of its capital administration.

The Group's management reviews its capital structure when it presents its financial projections as part of the business plan to the Entity's Board of Directors and shareholders.

Debt ratios

The Board of Directors regularly reviews the Group's capital structure. As part of this review, it considers the cost of capital and the risks associated with each capital type.

The leverage ratio at the end of each of the periods is the following:

	2016	2015	2014
Cash and cash equivalents	\$ 144,799	\$ 385,672	\$ 324,458
Debt	872,886	939,602	935,513
Net debt	728,087	553,930	611,055
Stockholders' equity	1,231,136	1,152,272	1,170,667
Index of net debt and equity	59.14%	48.07%	52.20%

The debt includes long-term debt and current portion.

Categories of financial instruments

	2016	2015	2014
Financial assets:			
Cash	\$ 144,799	\$ 385,672	\$ 324,458
Loans and account receivable	987,742	928,990	950,585
Financial liabilities:			
Liabilities at amortized cost	\$ 2,199,265	\$ 2,359,154	\$ 2,364,878

Fair value of financial instruments

The fair value of financial assets and short-term liabilities is similar to its carrying amount.

The fair value of the syndicated debt with HSBC and Inbursa is as follows:

2016		2015		2014	
Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount	Fair value
\$ 470,000	\$ 470,000	\$ 610,000	\$ 576,560	\$ 610,000	\$ 577,816

Financial risk management objectives

The Group's Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Entity through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk. Both financial risk management and the use of derivative financial instruments and non-derivative are governed by the policies of the Group.

The Group minimize the negative effects of these risks by using different strategies. According to the Group's statutes, it is prohibited to hire any kind of financing. Internal auditors periodically review compliance with policies and exposure limits. The Group does not subscribe or trade financial instruments for speculative or hedging purposes.

Market risk

The market risk refers to the erosion of cash flows, income and the value of assets and capital due to adverse changes in market prices, interest and exchange rates.

The Group's activities expose it to different risks, primarily exchange rate and financial risks derived from interest rate fluctuations. The Group exposure to market risks or the manner in which the latter are managed and measured have not changed significantly.

Exchange rate risk

The Group is exposed to exchange rate risks based on the balances of monetary assets and liabilities recognized in the consolidated statements of changes in financial position denominated in foreign currency (US dollars, Brazilian reals and Guatemalan quetzales).

Foreign currency sensitivity analysis

If the Mexican peso – US dollar exchange rate had increased by \$1 peso and all other variables had remained constant, the Entity's profit after tax at December 31, 2016, 2015 and 2014 would have been adversely affected by the amount of \$51,923, \$101,188 and \$82,979, respectively. However, a decrease of \$1 under the same circumstances would have positively affected the Entity's

comprehensive income by the same amount. The monetary items related to Brazilian reals and Guatemalan quetzales are presented as available-for-sale; as the related exchange rate fluctuations are presented within discontinued operations, the Entity does not prepare a sensitivity analysis for these foreign currencies.

Interest rate risk

The Entity is exposed to an interest rate risk based on loan interest rates because its subsidiaries obtain loans at variable interest rates (primarily the TIIE and LIBOR rates, although the latter is no longer relevant) which, represent approximately 86% at December 31, 2016 and 65% for 2015 and 2014, of the total debt contracted by the Entity. However, it minimizes this risk by providing follow-up on rate behavior, seeking variable rates when the rate is stable and following a downward trend and fixed rates when an upward trend is present.

Sensitivity analysis

The following sensitivity analyses are determined by considering the exposure of the interest rates contracted for derivative and non-derivative instruments at the end of the reporting period. In the case of variable-rate liabilities, the Group prepares an analysis based on the assumption that the liability in effect at the end of the reporting period was also in effect throughout the year.

At the time the key management personnel are informed internally on the interest rates risk, an increase or decrease of 100 basis points is used, which represents management's assessment of the possible reasonable change in interest rates. If the interest rates had been 100 basis points above/below and all the other variables remain constant:

	2016	2015	2014
Total debt at variable rates	\$ 872,886	\$ 939,602	\$ 935,513
Variable interest expense	76,544	78,635	77,696
Financial cost of debt percentage	8.77%	8.37%	8.31%
Sensitivity to + 100 base points	85,281	88,041	87,096
Sensitivity to –100 base points	67,823	69,249	68,386

Credit risk management

The credit risk is that which arises when one of the parties defaults on its contractual obligations, resulting in a financial loss for the Entity. The Group has adopted a policy of only becoming involved with solvent parties and obtaining sufficient guarantees, when appropriate, as a form of mitigating the risk of the financial loss caused by defaults.

In order to administer the credit risk, the Group's policy focuses on the investigation and subsequent selection of customers based on their reputation and economic solvency, assignment of credit limits and obtaining guarantees through the subscription of credit instruments, assets to debt ratio, pledges and mortgage guarantees duly supported by the legal representative and personal collateral.

Furthermore, follow-up is provided on the collection and recoveries of overdue debts based on their aging parameters, so as to timely identify doubtful accounts. Bad debts are sent to the attorneys for collection records.

The credit limits are revised constantly on a case-by-case basis.

Liquidity risk management

The liquidity risk is the situation whereby the Group is unable to fulfill obligations associated with financial liabilities settled through the delivery of cash or another financial asset. The Group's debt acquisition policy is very conservative. The Entity constantly monitors the maturity of its liabilities, together with the cash needed for transactions. Detailed monthly cash flow analyses are prepared and presented to the board of directors. Operating cash flows are controlled on a daily basis. Decisions regarding the obtainment of new financing are only made for expansion and growth projects.

The objective of debt management is to obtain long-term financing for contracted short-term debts. Accordingly, when assets are acquired and become productive, short-term debt is settled, while the cash flows needed to cover long-term debt are obtained through acquired investment properties.

The maturity of long-term debt and the current portion thereof and accrued liabilities at December 31, 2016, 2015 and 2014 as the transition date is as follows:

	December 31, 2016			
	Less than 1 year	1-2 years	3-5 years	Total
Bank loans	\$ 500,911	\$ 366,627	\$ 5,348	\$ 872,886
Suppliers	1,100,641	–	–	1,100,641
Other accounts payable	194,018	39,879	178,988	412,885
Related parties	6,871	–	–	6,871
	\$ 1,802,441	\$ 406,506	\$ 184,336	\$ 2,393,283

	December 31, 2015			
	Less than 1 year	1-2 years	3-5 years	Total
Bank loans	\$ 325,279	\$ 282,727	\$ 331,596	\$ 939,602
Suppliers	1,199,576	–	–	1,199,576
Other accounts payable	169,606	56,972	153,095	379,673
Related parties	9,909	–	–	9,909
	\$ 1,704,370	\$ 339,699	\$ 484,691	\$ 2,528,760

	December 31, 2014			
	Less than 1 year	1-2 years	3-5 years	Total
Bank loans	\$ 61,525	\$ 105,081	\$ 768,907	\$ 935,513
Suppliers	1,193,008	–	–	1,193,008
Other account payable	181,525	54,357	172,514	408,396
Related parties	9,486	–	–	9,486
	\$ 1,445,544	\$ 159,438	\$ 941,421	\$ 2,546,403

18. FINANCIAL DERIVATIVES

The Group uses financial derivatives in the form of cross currency swaps (CCS) and exchange rate forwards and exchange rate options as hedges to protect itself from exposure to variations in the BRL/USD exchange rate generated by the payment of the coupons (interest) and the current principal of the credit executed with HSBC for an amount of up to US \$8,494,733.

As of December 31, 2015, the fair value of the aforementioned transactions is as follows:

Instrument	Counterparty	Starting date	Maturity	Rate payable and exchange rate agreed	Notional amount in USD	Fair value
Currecnyc swap	Itau	February 2, 2016	February 2, 2017	CDI + 3.25%	750,263	\$ (3,941)
Currecnyc swap	Itau	February 5, 2015	February 2, 20167	CDI + 3.25%	517,424	\$ (2,267)
Currecnyc swap	Itau	September 15, 2016	March 14, 2017	CDI + 5.20%	740,082	\$ (929)
Forward	Banco Do Brasil	June 28, 2016	June 21, 2017	3.6459	1,040,262	\$ (2,415)
Forward	Banco Do Brasil	November 3, 2016	April 27, 2017	3.3897	565,627	\$ (452)
Currecnyc swap	HSBC	September 30, 20165	August 27, 2018	CDI + 2.00%	6,067,666	\$ (29,336)

The Group has designated the aforementioned financial derivatives under the fair value model (currency swaps) and cash flow hedges (exchange rate option), as permitted by IFRS, and has formally documented each hedge transaction, by establishing management objectives and strategy to cover the risk, and identify the hedge instrument, the item hedged, the nature of the risk to be hedged and the evaluation methodology for effectiveness.

As of December 31, 2016, the effectiveness of these hedges is high, because the changes in fair value and the cash flows from the primary position are offset in a range of between 80% and 125%. The results of the prospective and retrospective tests at the end of the year was of 99% and 99%, respectively.

The fair value of the currency swaps is \$36,472,912 mexican pesos, recorded as a liability with a change in the financial statement of income and the fair value of the covered transactions amount \$36,725,264 mexican pesos which was recorded as a charge to the debt against a credit to the income statement. Because there are small differences between the hedging instrument and the hedged item, there is an ineffective portion of \$252,352 mexican pesos that is recorded as income in the statement of income (the difference between the fair value of hedging instruments and the covered ones).

The method used to measure effectiveness is the “ratio analysis” based on a hypothetical derivative; such method consists of comparing the changes in the fair value of the hedge instrument with the changes in the fair value of the hypothetical derivative which would result in a perfect hedge of the item covered.

As of December 31, 2016, the fair value of the forwards was \$2,866,436 mexican pesos recorded as a liability against a charge in other comprehensive income. The effect recognized in equity was \$2,863,649 mexican pesos and the effect reclassified to the statement of income as an ineffective portion was \$2,787. The period in which the cash flow recognized in equity is expected to occur and impact the statement of income in April and June of 2017 because it is when the forwards expire.

19. BALANCES AND TRANSACTIONS WITH RELATED PARTIES

a. Balance due from related parties are:

	2016		2015		2014	
Mexichem Flúor, S.A. de C.V.	\$	4,455	\$	1,983	\$	4,996

	\$ 959,113	\$ 883,069	\$ 856,009

23. INCOME TAXES

The Group is subject to ISR. The rate of current income is 30%.

ISR – Under the new Income Tax Act 2014 (Act 2014) the rate was 30% for 2016, 2015 and 2014 and continue at 30% for the following years.

Tax regime in other countries – The ISR of foreign subsidiaries is caused by the rules of the law of income tax of those countries. In Brazil, the statutory tax rate for corporations is 34%

a. Income taxes (benefit) expense recognized are as follows:

	2016	2015	2014
ISR:			
Current tax	\$ 18,225	\$ 11,535	\$ 8,742
Deferred tax	(27,325)	(14,748)	4,388
	\$ (9,100)	\$ (3,213)	\$ 13,130

b. The main items originating a deferred ISR tax assets are:

	2016	2015	2014
Deferred ISR asset:			
Tax loss carryforwards	\$ 37,012	\$ 24,461	\$ 12,550
Provisions	39,164	28,932	27,402
Deferred ISR asset	76,176	53,393	39,952
Deferred ISR liability:			
Property, plant and equipment	(4,647)	(300)	(6,455)
Other assets	(47)	(10,680)	(5,090)
Inventories, net	(2,005)	(261)	(1,003)
Deferred tax liability	(6,699)	(11,241)	(12,548)
Total assets	\$ 69,477	\$ 42,152	\$ 27,404

c. The reconciliation of the statutory income tax rate and the effective rate expressed as a percentage of income (loss) before income taxes (benefit on income) is as follows:

	2016	2015	2014
Statutory rate	30%	30%	30%
Plus the effect of permanent differences mainly			
non-deductible expenses	9%	8%	39%
Add (less) – effects of inflation	22%	(9%)	5%
Less tax deduction portfolio		(20%)	–
Plus (less) – recognition of previously unrecognized benefits	–	(20%)	–
Effective rate	61%	(11%)	74%

- d. The benefits from tax loss carryforwards for which the deferred ISR asset has been recognized, can be recovered subject to certain conditions. The years of maturity and restated amounts to December 31, 2016, are:

Year of expiration	Tax loss carryforwards	
2024	\$	41,835
2025	\$	81,538
	\$	123,373

24. Non-cash transactions

During the Annual General Meeting of Shareholders on April 28, 2016, section VI, a ceiling in the reserve for repurchase of own shares was approved for an amount of \$30,000, this is the maximum amount that the Group will be able to pay for repurchase of own shares or credit titles that depicts them, on the understanding, that the acquisition and placement of own shares concerned, were realized by the Group through Bolsa Mexicana de Valores, S. A. B. de C. V. the affecting the accumulated results of the Group by an amount of \$43,340 to cancel the remaining reserve amount and record then the \$30,000.

During the years ended December 31, 2016, 2015 and 2014, the Group acquired equipment for a value of \$10,964, \$33,811 and \$33,836 through a financing lease. This acquisition is being reflected in the cash flow statements over the life of the leases through the payment of the rentals.

On December 30, 2016, the Group received a payment in kind of a real property with a value of \$2,333. Such amounts refer to the collection of an account which the group had with Solquimia Mexicana, S. A. de C. V. At the date of the payment in kind the account was \$401. As the Group has no plans to make use of this property, the Group's management has approved its classification as available for sale, for which reason it is recorded under the heading of long-term assets.

On May, 6, 2016, the Group executed a non-compete agreement with Distribuidora VEM, S. A. de C. V. for \$873, which is part of a termination agreement of a Group's account receivable for \$1,269.

25. Commitments

The Entity leases the building where corporate offices are located and some branch offices. The rental expense amounted to \$55,605, \$42,472 and 444,898 as of December 31, 2016, 2015 and 2014, respectively. The lease agreements have mandatory terms from 1 to 15 years and set the following minimum payments:

Year	Amount	
2017	\$	49,569
2018		43,090
2019		36,628
2020		32,630
2021		16,647
2021 and thereafter		69,485
	\$	248,049

26. Business segment information

Business segment information of the Group is as follows:

	2016		2015		2014

ABOUT THIS REPORT

G4-28, G4-29, G4-30, G4-31, G4-32, G4-33

This year we are presenting our third sustainability report and the second integrated, under the Global Reporting Initiative’s G4 guidelines. This year’s sustainability report has not been externally verified.

The sustainability information includes the results of the activities of our operations in Mexico regarding social and environmental issues based on the material aspects identified as part of our materiality in 2015, and the financial information includes the results of our operations in Mexico, Central America and Brazil.

This information corresponds to the period between January 1 and December 31, 2016, and we present the report on a yearly basis.

We also provide an online report for the convenience of our readers and a social responsibility site where you can find more information about the company, and both our financial and sustainability results.
